2.3.3.7 Partial Settlement Thresholds - Search/List Screen	251
2.3.3.8 Tolerance Amounts - Search/List Screen	253
3 User Instructions Part	255
3.1 General	255
3.2 Rule Sets	256
3.2.1 Configuration of a New CoSD Rule Set	256
3.2.1.1 Create a New CoSD Rule Set	257
3.3 Liquidity Transfers	258
3.3.1 Creation of a New Standing/Predefined Liquidity Transfer Order	258
3.3.1.1 Create a New Liquidity Transfer Order Link Set	259
3.4 Market-Specific Attributes	260
3.4.1 Configuration of a New Market-Specific Attribute	260

3.4.1.1 Create a New Market-Specific Attribute	260
3.4.1.2 Create a New Attribute Domain	262
3.4.2 Assignment of a Market-Specific Attribute Value	263
3.4.2.1 Assign a Market-Specific Attribute Value to a Party	264
3.4.2.2 Assign a Market-Specific Attribute Value to a Security	266
3.4.2.3 Assign a Market-Specific Attribute Value to a Securities Account	268
3.5 Restriction Types	270
3.5.1 Configuration of a New Restriction Type	270
3.5.1.1 Create a New Restriction Type	270
3.5.1.2 Configure a Restriction Type Rules	272
3.5.2 Assignment of a Restriction Type	275
3.5.2.1 Assign a Restriction Type to a Party	275
3.5.2.2 Assign a Restriction Type to a Security	277
3.5.2.3 Assign a Restriction Type to a Securities Account	278
3.5.2.4 Assign a Restriction Type to a T2S Dedicated Cash Account	280
3.5.2.5 Assign a Restriction Type to an external RTGS Account	282
3.6 Reference Data Configuration for the Settlement Process	284
3.6.1 Configuration for Intra-CSD Settlement	284
3.6.1.1 Create a New Participant	284
3.6.1.2 Create a New Securities Account	286
3.6.1.3 Configure Security CSD Links	287
3.6.2 Configuration for Cross-CSD Settlement	289
3.6.2.1 Create a New Securities Account	289
3.6.2.2 Configure Security CSD Links	291
3.6.2.3 Configure CSD Account Links	292
3.6.2.4 Configure Eligible Counterpart CSD	293
3.6.3 Configuration for External-CSD Settlement	294
3.6.3.1 Configure Security CSD Links	295
3.6.3.2 Configure CSD Account Links	296
3.7 Account Management	298
3.7.1 Administration of Securities Accounts	298
3.7.1.1 Create a New Securities Account	298
3.7.1.2 Edit an Existing Securities Account	300
3.7.1.3 Delete an Existing Securities Account	302
3.7.2 Administration of Cash Accounts	303
3.7.2.1 Create a New External RTGS Account	304
3.7.3 Configuration for a Central Bank	305
3.7.3.1 Create a New T2S Dedicated Cash Account	306
3.7.3.2 Create a New Credit Memorandum Balance	307
3.7.3.3 Set up an Auto-Collateralisation Limit	311
3.7.3.4 Create a New Participant	312

3.7.3.5 Create a New Securities Account	314
3.7.3.6 Link a Securities Account to a T2S Dedicated Cash Account for Cash Settlement Purpose	315
3.7.4 Configuration for Central Bank Collateralisation	316
3.7.4.1 Create a New Participant	317
3.7.4.2 Create a New T2S Dedicated Cash Account	318
3.7.4.3 Create a New Credit Memorandum Balance	320
3.7.4.4 Set up an Auto-Collateralisation Limit	323
3.7.4.5 Create a New Securities Account	324
3.7.4.6 Link a Securities Account to a T2S Dedicated Cash Account for Cash Settlement Purpose	326
3.7.5 Configuration for Client Collateralisation	327
3.7.5.1 Create a New Credit Memorandum Balance	327
3.7.5.2 Set up an Auto-Collateralisation Limit	331
3.7.5.3 Create a New Participant	332
3.7.5.4 Create a New Securities Account	334
3.7.5.5 Link a Securities Account to a T2S Dedicated Cash Account for Cash Settlement Purpose	335
3.8 Securities	336
3.8.1 Administration of Securities	336
3.8.1.1 Create a New Security	336
3.8.1.2 Configure Security CSD Links	338
3.8.1.3 Create a New Securities Valuation	340

Terms and Abbreviations

The terms and abbreviations are shown in the table below. You find terms with their description and the abbreviations, both in an alphabetical order.

Letter	Description
C	
Check box 	Square box which can be filled with a checkmark by clicking on it with the mouse. In contrast to the radio button, you can select more than one option with a check box.
D	
DD	Day (e.g. used within the timestamp, every letter stands for one digit)
d	Decimal number
E	
e.g.	For example (Latin: 'exempli gratia')
G	
GUI	Graphical user interface which is a type of user interface which allows users to interact with electronic devices.
H	
hh	Hour (e.g. used within the timestamp, every letter stands for one digit)
I	
i.e.	That is (Latin: 'id est')
IP port	Internet Protocol address port, is the port which connects a numerical label assigned to each device (e.g., computer, printer) participating in a computer network that uses the Internet Protocol for communication.
Incl.	Including
M	
Mouse-over 	Additional information for some elements of the GUI is only shown when you move the mouse-pointer to these elements.

Letter	Description
MM	Month (e.g. used within the timestamp, every letter stands for one digit)
mm	Minute (e.g. used within the timestamp, every letter stands for one digit)
min.	Minimum
max.	Maximum
10m	10 million
N	
NRO	Non-repudiation of origin (NRO) provides the recipient (CRDM) with the evidence NRO which ensures that the originator (CRDM actor) will not be able to deny having sent the U2A instruction. The evidence of origin is generated by the originator and held by the recipient.
Q	
QQ	Quarter, indicates a time span of three months, e.g. Q2 stands for the second quarter of the year.
R	
Radio button 	A type of GUI element which allows the user to choose only one of a predefined set of options.
S	
Select box 	A select field in the GUI with an arrow on the right side. By clicking on the arrow, all possible input values are shown and can be selected with a mouse-click.
SS	Semester, indicates a time span of six months, e.g. S1 stands for the first semester.
ss	Second (e.g. used within the timestamp, every letter stands for one digit)
T	
10t	10 thousand

Letter	Description
Timestamp	A sequence of characters, denoting the date and the time in CRDM.
Y	
YYYY	Year (e.g. used within the timestamp, every letter stands for one digit)

1 Introduction

1.1 Overview of the User Handbook

The Common Reference Data Management User Handbook Book 2, hereinafter called CRDM UHB Book 2, aims at facilitating the use of the Graphical User Interface of CRDM (CRDM GUI).

Book 2 is focused on the reference data objects that are used in T2S. The UHB provides detailed reference information on these GUI screens and step-by-step instructions for typical workflows.

Target Audience

Within CRDM UHB Book 2 all T2S actors: central banks (CBs), central securities depositories (CSDs), CSD participants, external CSD users, payment banks/settlement banks can find detailed screens documentation of features related to reference data objects that are used in T2S.

By referring to the table of contents as well as to the usage indication list, each reader can easily identify the relevant parts.

Related Documentation

The UHB is part of the functional documentation and complements the general, technical and detailed specifications. Among these, the UDFS is particularly relevant for UHB readers, although it is mainly focused on the application-to-application mode (A2A). In addition to the CRDM specifications, the Business Functionality for CRDM Graphical User Interface - as the basis for the design and implementation of the GUI - provides helpful information. References to the GUI Business Functionalities are made in the screen descriptions of the UHB.

Updates

Updated versions of the UHB will be provided on a regular basis.

2 Screen Reference Part

2.1 General

The screen reference part offers a complete overview of all CRDM GUI screens that are available in U2A mode. Each screen description focuses on a single screen and explains all fields contained therein. An exception is made for the *new* and *edit* screens, which are largely similar and therefore included in a single screen description. The description is always based on and contains only the screenshot of the *edit* screen, but describes deviations for the *new* screen in a separate row for each field or button description.

Illustration 1: Example of a *new* and *edit* screen description

Position No.	Element
1	Description relevant for <i>edit</i> mode.
2	Description relevant for <i>new</i> mode.

In detail, every screen description has the same structure and contains the following elements.

Context of Usage

The context of usage explains what a screen displays, what you can do with the screen and which special features are available for the screen, for example the need for confirmation in 4-eyes mode or usage restrictions. If the export functionality produces more data than shown on the screen (if a *list* screen is based on a detailed query), this is also indicated in the context of usage.

Screen Access

The screen access lists all possible ways to access the screen. This includes navigation via the menu and navigation via other screens.

Examples

Navigation via the menu:

Common >> Cash >> Cash Accounts >> Search

Navigation via other screens:

Common >> Parties >> Parties >> Technical Address Network Service Link >>
Click on the new or edit button

When navigating via a *search/list* or *list* screens, a data record has to be selected by clicking on a table row. Afterwards, you can click on specific buttons in the button bar, e.g. the *edit* or *details* button.

The privileges segment lists all necessary privileges to access the screens and to use its functions. First, the privileges to access a screen are mentioned, followed

Privileges	by the privileges that are necessary to use all functions on the screen. For further information, refer to the list of privileges [▶].
References	The first reference lists all business scenarios containing the respective screen (reference to the user instructions part). The second reference indicates the business functions related to the respective screen (reference to GUI Business Functionalities Document).
Screenshot	<p>You can use the screenshot as orientation for your work with the UHB. All screenshots are based on the maximum of access rights, so deviations are possible if you do not own all privileges which are necessary to use the screen in its full extent. In addition, deviations between the screenshot and the field/button description are possible in the case of mutually exclusive functions and based on a specific selection you have made. Values shown on the screenshot might also deviate from the default values indicated in the description.</p> <p>In the case of the <i>new/edit</i> screen description, the screenshot of the <i>edit</i> screen is used. Differences appearing in the <i>new</i> screen are explained in the field description.</p>
Field Description	<p>The field description provides all the relevant information related to the respective field name. It is structured in table format with a separate table for each frame. Subframes are indicated by subsection headings in the table. The following illustration explains the structure of a field description.</p>

Party 2	
Opening Date 1	<p>Enter the opening date of the party or use the calendar icon. 3</p> <p>Reference for error message []: 6</p> <ul style="list-style-type: none"> DPC1205 DPU1206 DPU1208 <p>The inserting opening date must be equal or greater than the current business date. 5</p> <p>This field is mandatory in create mode.</p> <p>This field is read-only in edit mode if the current business date is greater than the "opening date". 7</p> <p>Required format is: YYYY-MM-DD. 4</p>

Illustration 2: Example of a screen description

Position No.	Element	Description
1	Field name	<p>... indicates the respective name of each screen field.</p> <p>Mandatory fields are marked with an asterisk after the field name. In the case of the <i>new/edit</i> screen description, the mandatory field is marked with an asterisk in brackets, which indicates that the respective field is either mandatory in the edit or in the new mode. Input and select fields without an asterisk are always optional.</p>
2	Frame name	... indicates the respective name of each screen frame.
3	Sub-frame name	... indicates the respective name of each screen sub-frame.
4	Field description	<p>... indicates the field type and required content. Each field description starts with a keyword, which illustrates your required activity:</p> <ul style="list-style-type: none"> ■ 'Shows...' indicates a read-only field [] ■ 'Select...' indicates a select field [] ■ 'Enter...' indicates an input field [] ■ 'Enter or select...' indicates an input sensitive select box or an input field with suggestions [] <p>If there is an exhaustive list of possible values, these are listed.</p>
5	Required/Displayed format	<p>... indicates all field format requirements related to the fields. If there is more than 1 format requirement, they are separated with a comma.</p> <p>In read-only fields the displayed format is only mentioned, if the field content is ambiguous. This applies especially to date fields.</p> <p>The following keywords are used for the format requirements:</p> <ul style="list-style-type: none"> ■ 'Digit' indicates numbers

Position No.	Element	Description
		<ul style="list-style-type: none"> 'Character' indicates a character from the SWIFT-x character set. 'Letter' indicates upper and lower case letters of the Latin alphabet
6	Cross-field validations	<p>... indicate interdependencies between fields relevant for the validation of your input.</p> <p>For further details on the validation process, refer to section "Validation" in CRDM UHB Book 1.</p>
7	References for error messages	<p>... indicates the code of all possible errors applying to the field during the back-end validation. The corresponding error text and error description is listed in the annex (list of references for error messages [▶]).</p> <p>For further details on the validation process, refer to section "Validation" in CRDM UHB Book 1.</p>
8	Additional information	... section indicates the useful information that is for filling in the field.

Buttons

All buttons specific to the screen are listed and described in a table at the end of the screen description. The following illustration explains the structure of a button description.

Buttons	
1 Edit	<p>2 This function enables the user to edit the details of the selected party.</p> <p>3 If the status of the selected party is set to 'Deleted', this function is not available.</p> <p>4 If you have accessed this screen via another screen, this function is not available</p>

Illustration 3: Example of a button description

Position No.	Element	Description
1	Button name	... indicates the respective name of each button.
2	Button description	... indicates the action that is triggered when clicking on the button. Each button description starts with 'This function enables you...'
4	Cross-field validations	<p>... indicate interdependencies between a field and the button relevant for the validation of your input.</p> <p>For further details on the validation process, refer to validation [].</p>
5	References for error messages	<p>... indicates the code of all possible errors applying to the button during the back-end validation. The corresponding error text and error description is listed in the annex (list of references for error messages []).</p> <p>For further details on the validation process, refer to section "Validation" in CRDM UHB Book 1.</p>
6	Additional information	... section indicates useful information regarding the button and/or its function.

For further information on common buttons, refer to Common Buttons and Icons.

2.2 T2S

2.2.1 Parties

2.2.1.1 Eligible Counterpart CSDs - Search/List Screen

Context of Usage

This screen enables the user to display a list of Eligible counterpart CSDs matching the entered criteria. The search results is displayed in a list, which is sorted by the values of the 'Valid from' column in ascending order (default setting). After selecting an entry, the user can proceed further by clicking on the buttons below.

Screen Access

■ T2S >> Parties >> Eligible Counterpart CSDs >> Search

Privileges

To use this screen, the following Privileges [] are needed:

- Eligible Counterpart CSD list query
- Delete Eligible Counterpart CSD link

2.2.1.3 Eligible Counterpart CSD – New/Edit Screen

Context of Usage

This screen enables the user to create a new Eligible Counterpart CSD or to edit an existing one, previously selected. The screen has a slightly different behaviour depending on the function the user is submitting.

Eligible Counterpart CSD can only be created and updated by CSD users or the Service Operator. Users can only update Eligible Counterpart CSD entities whose Investor CSD is the CSD they belong to.

Screen Access

- T2S >> Parties >> Eligible Counterpart CSD >> New
- T2S >> Parties >> Eligible Counterpart CSD >> *Eligible Counterpart CSDs – search/list* screen >> Click on the *new* or *edit* button
- T2S >> Parties >> Eligible Counterpart CSD >> *Eligible Counterpart CSDs – search/list* screen >> Click on the *details* button >> *Eligible Counterpart CSD – details* screen >> Click on the *edit* button

Privileges

To use this screen, the following Privileges [►] are needed:

- Create Eligible Counterpart CSD link
- Update Eligible Counterpart CSD link

2.2.2 Securities

2.2.2.1 Auto-Collateralisation Eligibility Links - Search/List Screen

Context of Usage

This screen allows the user to search for Auto-Collateralisation Eligibility Links. The search results is displayed in a list, which is sorted by the values of the 'ISIN' column in ascending order (default setting). After selecting an entry, the user can proceed further by clicking on the buttons below.

Auto-collateralisation Eligibility Link can only be deleted/restored by Service Operator, NCB or Payment Bank. Users belonging to an NCB can only delete/restore Auto-collateralisation Eligibility Link for its own NCB or Parties that fall under their responsibility according to the Hierarchical Party Model. Users belonging to a Payment Bank can delete/restore only Auto-collateralisation Eligibility Link for their own Party.

Screen Access

T2S >> Securities >> Auto-Collateralisation Eligibility Links >> Search

Privileges

To use this screen, the following Privileges [] are needed:

- Delete auto-collateralisation eligibility
- Auto-Collateralisation Eligibility Links query

2.2.2.12 Security CSD Link – New/Edit Screen

Context of Usage This screen contains a number of fields regarding Security CSD Link. You can enter new data or edit existing ones. Afterwards you can proceed further by clicking on the buttons below.

Screen Access | T2S >> Securities >> Security CSD Link >> *Search/List* screen >> Click on the *New* button

| T2S >> Securities >> Security CSD Link >> *Search/List* screen >> Click on the *Edit* button

| T2S >> Securities >> Security CSD Link >> New

Privileges To use this screen, the following Privileges [►] are needed:

- | Create Security CSD Link
- | Update Security CSD Link

Screenshot

The screenshot displays the 'SECURITY CSD LINK UPDATE' form. At the top, there's a breadcrumb trail: T2S > Securities > Security CSD Link > Search > Edit. The form includes several input fields and checkboxes. The 'ISIN' field is populated with 'HUUEURPA0013'. The 'Link Type' dropdown is set to 'Issuer'. The 'Valid From' date is '2015-02-26' and the 'Valid To' date is '9999-12-31'. The 'Parent BIC' is 'TCSOTCSXXX' and the 'Party BIC' is 'CSDAHUHBXXX'. The 'Securities Maintenance' checkbox is unchecked, and the 'Default Link' checkbox is checked. Below these, there's a 'Technical Issuer' section with 'Parent BIC' and 'Party BIC' fields, both set to 'Choose BIC'. At the bottom, there's an 'Issuance Accounts' section with a table for 'Issuance Account Number' and 'Primary'. The table is currently empty, showing 'No Rows To Show'. On the right side of the form, there are buttons for 'Submit', 'Reset', and 'Cancel'.

2.2.4.3 CMB – New/Edit Screen

Context of Usage

This screen enables the user to create a new Credit Memorandum Balance (CMB) or to edit an existing one, previously selected. The screen has a slightly different behaviour depending on the function the user is submitting.

When performing a Credit Memorandum Balance update request, the Party Type of the Requestor must be Service Operator, NCB or Payment Bank. A user be-

longing to a NCB can only update Credit Memorandum Balance for T2S Dedicated Cash Account falling under his responsibility, according to the Hierarchical Party Model. A user belonging to a Payment Bank can only amend Credit Memorandum Balance with Primary CMB flag set to false for T2S Dedicated Cash Account falling under his responsibility according to the Hierarchical Party Model.

Screen Access

2.3.2.2 CoSD Rule Sets - Details Screen

Context of Usage This screen displays detailed information on the selected CoSD Rule Set. You can check the data and proceed further by clicking on the buttons below.

CoSD Rule List is only shown after clicking on the related button, if the user is granted with the required privileges. Same principles applied for editing or deleting a CoSD Rule.

Screen Access | Common >> Market-Specific Configuration >> CoSD Rule Set >> *CoSD Rule Set – search/list* screen >> Click on the *search* and/or *details* button

Privileges To use this screen, the following Privileges [▶] are needed:

- | Conditional Security Delivery Rule Set Query
- | Delete Conditional Security Delivery Rule Set
- | Conditional Security Delivery Rule List Query
- | Delete Conditional Security Delivery Rule

Screenshot

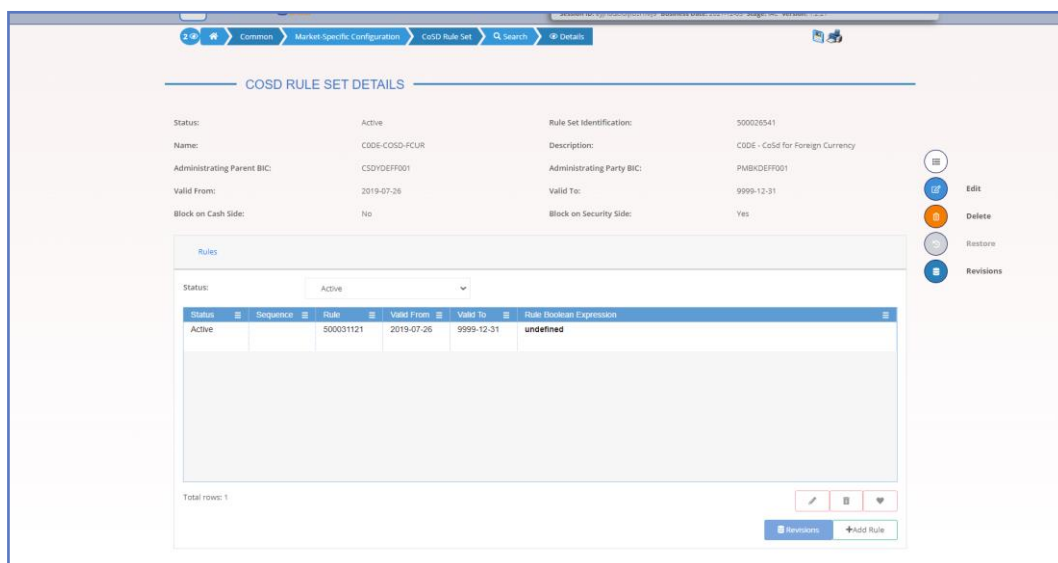

Illustration 49: CoSD Rule Sets – details screen

Fields Description

CoSD Rule Set	
Status	Shows the status of the conditional securities delivery rule set.
Rule Set Identification	Shows the identification of the conditional securities delivery rule set.
Name	Shows the name of the conditional securities delivery rule set.
Description	Shows the description of the conditional securities delivery rule set.

CoSD Rule Set	
Administrating Parent BIC	Shows the parent BIC of the administrating party.
Administrating Party BIC	Shows the party BIC of the administrating party.
Valid From	Shows the date from which the conditional securities delivery rule set is valid.
Valid To	Shows the date until which the conditional securities delivery rule set is valid.
Block on Cash Side	Shows whether T2S shall block cash when an instruction is marked for conditional delivery.
Block on Security Side	Shows whether T2S shall block securities when an instruction is marked for conditional delivery.

CoSD Rules	
Status	Select the status of the conditional securities delivery rule from the possible values: <ul style="list-style-type: none"> ■ All ■ Active (default value) ■ Deleted
Status	Shows the status of the conditional securities delivery rule. If the status is set to 'Deleted', the selected conditional securities delivery rule cannot be deleted or edited. If the status is set to 'Active', the selected conditional securities delivery rule cannot be restored.
Sequence Number	Shows the sequence related to the conditional securities delivery rule.
Rule	Shows the technical identification of the conditional securities delivery rule.

CoSD Rules	
Valid From	Shows the date from which the conditional securities delivery rule is valid.
Valid To	Shows the date until which the conditional securities delivery rule is valid.
Rule Boolean Expression	Shows the parameters applicable to the rule.

Buttons

Fields Description

CoSD Rule Set	
Status	Shows the status of the conditional securities delivery rule set.
Rule Set Identification	Shows the identification of the conditional securities delivery rule set.
Name	Shows the name of the conditional securities delivery rule set.
Adminstrating Parent BIC	Shows the parent BIC of the administrating party.
Adminstrating Party BIC	Shows the party BIC of the administrating party.
Valid From	Shows the date from which the conditional securities delivery rule set is valid.

CoSD Rule Set	
Valid To	Shows the date until which the conditional securities delivery rule set is valid.
Block on Cash Side	Shows whether T2S shall block cash when an instruction is marked for conditional delivery.
Block on Security Side	Shows whether T2S shall block securities when an instruction is marked for conditional delivery.

CoSD Rule	
Rule	Shows the technical identification of the conditional securities delivery rule. This field is read only and visible only in edit mode.
Sequence Number	Enter the sequence number related to the conditional securities delivery rule. This field is mandatory. Required format is: Numeric. References for error messages []: <ul style="list-style-type: none"> ■ DRCO040 ■ DRUO040
Valid From	Enter or pick the date from which the conditional securities delivery rule is valid. This field is mandatory. If the date is in the past, this field is read-only. Required format is: Date. References for error messages []: <ul style="list-style-type: none"> ■ DRCO020 ■ DRUO010 ■ DRUO020

CoSD Rule	
Valid To	<p>Enter or pick the date until which the conditional securities delivery rule is valid.</p> <p>Required format is: Date.</p> <p>References for error messages []:</p> <ul style="list-style-type: none"> DRCO030 DRUO030
CoSD Rule Processing	Select whether the settlement instruction matching the rule must be settled conditionally or not.
Boolean Expression	<p>This field shows the groups of parameters related to a conditional securities delivery rule .</p> <p>This field is read-only.</p> <p>It is filled by adding a new group to the groups' box.</p> <p>Example of a Boolean expression of a rule with two groups: (ISIN = XX AND Securities Account Number = YYY) as Group A OR (ISIN = WW AND Securities Account Number = ZZZ) as Group B.</p>

Predicates (Set of groups of Parameters)	
<p>Enables the user to enter the groups of parameters related to a conditional securities delivery rule .</p> <p>It is possible to add one or more predicate to a group. A predicate is a parameter and the user is allowed to enter the predicates one by one. The user must select the type of parameter to be added in a select box and the relevant input field(s) is/are shown.</p> <p>In a group a parameter can appear only once. The aforementioned select box must not show a parameter type if already present in the group.</p> <p>The already inserted parameters in a group can be amended.</p>	
Group	<p>Group of the Parameters related to a Rule. When the user clicks on the edit group button, the displayed pop-up shows a text field where inserting the Group Name.</p> <p>This field is always present and mandatory.</p> <p>References for error messages []:</p> <ul style="list-style-type: none"> DRCO300

Add Group	This function enables the user to add a group in the groups box in which the user can enter the name of the new group. After inserting a name and pushing the “ok” button in the popup, the group name is added to the Boolean Expression.
Edit Group	This function enables the user to edit a group name.
Delete Group	Pushing this button, the selected group is removed from the Boolean Expression with all its parameters.
Reset	This function restores the situation shown at opening of the page.
Cancel	This function enables the user to cancel the creation or the edit action. No operations are performed.
Add predicate	If the user pushes this button, the system shows a pop-up with select box to choose the proper parameter type. After selecting the parameter type, the field(s) for the parameter value is/are shown. After inserting a value and pushing the “ok” button in the popup, a value is inserted in the selected relevant group box.
Edit predicate	If the user pushes this button, the system shows a pop-up with a editable select box containing the actual Parameter Value. The user can change the Parameter Value. After editing a new value and pushing the “ok” button in the popup, the new value appears in the relevant group box.
Delete predicate	Pushing this button, the selected predicate is removed from the relevant group.

2.3.3 General Configuration Parameters

2.3.3.1 Attribute Domains - Search/List Screen

Context of Usage This screen contains a number of search fields. By inputting the relevant data, you can search for attribute domains. The search results will be displayed in a list, which is sorted by the values of the ‘Name’ column in descending order (default setting). After selecting an entry, you can proceed further by clicking on the buttons below.

Screen Access [Common >> General Configuration Parameters >> Attribute Domains >> Search](#)

Privileges

To use this screen, the following Privileges [►] are needed:

- Attribute Domain List Query
- Delete Attribute Domain

Reset	This function enables the User to set default search criteria and blanks out all optional criteria.

2.3.3.8 Tolerance Amounts - Search/List Screen

Context of Usage	<p>This screen allows the authorised users to search for the tolerance amounts.</p> <p>The Service Operators can additionally manage the tolerance amounts creating new ones or editing, deleting or restoring existing ones.</p> <p>The result list is displayed sorted by default by "Status", "Valid from", "Currency".</p>
Screen Access	<p>Common >> General Configuration Parameters >> Tolerance Amounts >> Search</p>
Privileges	<p>To use this screen, the following Privileges [▶] are needed:</p> <ul style="list-style-type: none"> Tolerance Amount query Delete Tolerance Amount

Screenshot

Status	Valid From	Cash Value Amount Limit	Tolerance Amount	Currency
Active	2016-07-07	750,000	15	DKK
Active	2016-07-07	99,999,999,999,999	187	DKK
Active	2014-09-30	100,000	2	EUR
Active	2014-09-30	1,000,000,000,000,000	25	EUR
Active	2019-02-28	80,000	1	GBP
Active	2019-02-28	99,999,999,999,999	18	GBP

Total rows: 6

Illustration 59: Tolerance Amount – search/list screen

Fields Description

Tolerance Amounts - Search Criteria	
Status	<p>Select the status of the tolerance amount from the possible values:</p> <ul style="list-style-type: none"> All Active (default value) Deleted
Valid From	<p>Enter or pick the date from which the set of tolerance amount values is valid.</p> <p>Required format is: Date.</p>
Currency	<p>Select the currency code of the tolerance amount from the drop-down menu.</p> <p>The default value is 'All'.</p>

Tolerance Amount - List	
Status	Shows the status of the tolerance amount.
Valid From	Shows the date from which the set of tolerance amount values is valid.
Cash Value Amount Limit	Shows the cash value until which the tolerance amount is valid.
Tolerance Amount	Shows the tolerance amount value within the range identified by the cash value amount limit.
Currency	Shows the currency code related to the tolerance amount.

Buttons

Search	This function enables the User to start a search according to the entered criteria. The results are displayed in a list on the same screen.
Reset	This function enables the User to set default search criteria and blanks out all optional criteria.

3 User Instructions Part

3.1 General

The user instructions part comprises scenarios adapted from typical user workflows. They are grouped into related activities, called business packages, which are further grouped into categories.

Categories

The categories are a structural element and do not contain any information.

Business Packages

The business packages define an overall task. They include an overview and a list of the business scenarios. In detail, each business package description has the same structure and contains the following elements.

Overview

The overview describes the aim and the background of the business package. It also explains the interrelation of the business scenarios.

List of Business Scenarios

This section contains a list of all business scenarios belonging to the business package.

The list is unordered if the business scenarios represent alternative ways to achieve the aim of the business package. It is ordered if the business scenarios have to be carried out sequentially. Sequential business scenarios do not necessarily have to be carried out directly after each other. The sequence only implies that 1 business scenario is a prerequisite for the following ones.

Business Scenarios

Each business scenario represents a single workflow and consists of single action steps, intermediate results and a final result. In detail, each business scenario description has the same structure and contains the following elements.

Context of Usage

The context of usage describes the aim of the business scenario and indicates whether this business scenario is mandatory or optional in order to fulfill the overall business package. It also contains the usage restrictions and the pre-requisites (excluding the privileges), if available.

Privileges	In this section, all the necessary privileges to access and use the involved screens are listed. First the privileges to access the first screen are mentioned, followed by the privileges necessary to proceed with the business scenario. Afterwards, the privileges for the following screens are mentioned in the same order.
Reference	This section lists all references to the screens involved, in order of their appearance in the business scenario.
Instructions	Each workflow is described from the start to the end, beginning with the access to the starting screen. The instructions involve a number of separate steps which lead you through a series of screens and actions. Each action step is focused on 1 single action. Intermediate results are included and the instructions end with a final result. Possible alternatives and repetitions are highlighted with a notice sign.

Example

1. *Action step 1*
2. *Action step 2*
- ⇒ *Intermediate result*
3. *Action step 3*
- ➡ *Result*

3.2 Rule Sets

3.2.1 Configuration of a New CoSD Rule Set

Overview This business package describes the configuration of a new CoSD rule set, which is necessary in a conditional settlement process in order to identify if the process applies to a settlement instruction based on a set of rules.

Each T2S actor can have many active rule sets at any given point in time. Each rule set can include many rules. Each rule can include many groups of parameters. The maximum overall number of groups of parameters for the active rule sets is 1000. Each rule can include many parameters. Within each rule, each parameter can be linked to many distinct values. The maximum overall number of distinct values for the active rule sets is 50.

To configure a new CoSD rule set, carry out the following business scenario:

Business Scenario **I** Create a new CoSD Rule Set [▶]

3.2.1.1 Create a New CoSD Rule Set

Context of Usage

This business scenario describes how to create a new CoSD rule set.

In order to use conditional settlement, a CSD needs to define a set of rules in CRDM, i.e. a number of CoSD rules organised into CoSD rule sets.

The configuration of a rule set allows you to define the criteria according to which T2S checks whether a conditional settlement process has to be triggered or not on a settlement instruction.

If you define more than one rule for a specific CoSD rule set, these rules will be applied in a specifically defined sequential order.

Creating a new CoSD rule set is mandatory for the configuration of a CoSD rule set.

This business scenario is not relevant for central bank, CSD participant and payment bank users.

Privileges

To carry out this business scenario, you the following privileges []:

- Create conditional security delivery rule
- Create conditional security delivery rule set
- Conditional security delivery rule set query

Reference

Further information on screens involved can be found in the screen reference part:

- *CoSD rule sets - search/list* screen []
- *CoSD rule set - new/edit* screen []
- *CoSD rule - new/edit* screen []
- *CoSD rules – list* screen []

Instructions

1. Go to the *conditional securities delivery rule sets – search/list* screen.
Common >> Market Specific Configuration >> CoSD Rule Sets >> Search
2. Click on the *new* button.
⇒ The *CoSD rule set - new* screen is displayed.
3. Enter all mandatory information about the rule set you want to create in the 'CoSD Rule Set' frame.
4. Click on the *submit* button.
⇒ A new CoSD rule set has been created without any rule attached.
5. Go to the *CoSD rule sets – search/list* screen:
Common >> Market Specific Configuration >> CoSD Rule Sets >> Search
5. Enter the information about the CoSD rule set you have just created.
6. Click on the *search* button.
7. Select the CoSD rule set you have just created.

8. Click on the *rules* button.
 - ⇒ The *CoSD rules - list* screen is displayed.
9. Click on the *new* button.
 - ⇒ The *CoSD rule – new* screen is displayed.
10. Enter all mandatory information about the rule set you want to create.
11. Click on the *add row* button in the 'CoSD Rule Parameters' frame.
12. Enter the name of the new group and all the other information of the rule you want to create.
13. Click on the *submit changes* button.
 - ⇒ The parameters have been added to the rule.

Repetition

To create another new group, repeat the steps 11, 12 and 13.
You can add up to 10 parameters for all the created groups.

Alternatives

To set all fields to default value and blank out all optional fields, click on *reset* button.
To cancel the process and return to the previous screen, click on *cancel* button.

14. Click on the submit button.
 - ➡ The new CoSD rule set has been created.

3.3 Liquidity Transfers

3.3.1 Creation of a New Standing/Predefined Liquidity Transfer Order

Overview

This business package describes the configuration of a standing/predefined liquidity transfer order.

A predefined or standing liquidity transfer order is a liquidity transfer from a T2S dedicated cash account to an credited account for a future execution, triggered by a business event or a precise point in time.

To configure a standing/predefined liquidity transfer order, carry out the following business scenarios in the predefined order:

Business Scenarios

- Create a new standing/predefined liquidity transfer order [Book 1]
- Create a new liquidity transfer order link set [▶]

3.3.1.1 Create a New Liquidity Transfer Order Link Set

Context of Usage	<p>This business scenario describes a group of standing liquidity transfer orders that provide liquidity from one T2S dedicated cash account to one or more credited accounts in a certain order (i.e. multiple liquidity provision).</p> <p>In order to add a standing liquidity transfer order to the liquidity transfer order link set, it is necessary that this standing liquidity transfer order is active and related to the same active T2S dedicated cash account.</p> <p>Before you start, check whether the relationship among the liquidity transfer orders is time dependent. In this case, it is necessary to specify a 'Valid To' date, in addition to other mandatory data such as BIC or parent BIC.</p> <p>Creating a new liquidity transfer order links set is optional for the configuration of a standing/predefined liquidity transfer order.</p> <p>The business scenario is not relevant for CSD and CSD participant users.</p>
Privileges	<p>To carry out this business scenario, you need the following privileges [▶]:</p> <ul style="list-style-type: none"> ▶ Liquidity transfer order link set query ▶ Create liquidity transfer order link set
Reference	<p>Further information on screens involved can be found in the screen reference parts:</p> <ul style="list-style-type: none"> ▶ <i>Standing/predefined liquidity transfer order link sets – search/list</i> screen [▶] ▶ <i>Standing/predefined liquidity transfer order link set – new/edit</i> screen [▶]
Instructions	<ol style="list-style-type: none"> 1. Go to the <i>standing/predefined liquidity transfer order link sets – search/list</i> screen: T2S >> Cash >> Standing/Predefined Liquidity Transfer Order Link Sets >> Search 2. Click on the <i>new</i> button. ⇒ The <i>standing/predefined liquidity transfer order link set – new</i> screen is displayed. 3. Enter all mandatory information about the liquidity transfer order link set you want to create in the 'Liquidity Transfer Order Link Set New' frame. 4. To add a liquidity transfer order link, go to the 'Liquidity Transfer Order Links' frame. 5. Enter all mandatory information about the liquidity transfer order link into the text fields or select the respective value from the drop-down menu. 6. Click on the <i>submit changes</i> button. ⇒ A new liquidity transfer order link has been added to the order sequence and liquidity transfer order reference list.

Repetition

To add more liquidity transfer order links, repeat steps 4 to 6.

You can add up to 10 links.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

7. Click on the *submit* button.

➔ The new liquidity transfer order link set has been created.

3.4 Market-Specific Attributes

3.4.1 Configuration of a New Market-Specific Attribute

Overview

This business package describes the configuration of a new market-specific attribute.

In addition to the standard set of reference data, CRDM gives you the possibility to configure specific personal attributes limited to a specific party. These attributes can be used for information purposes or for the configuration of restriction types. A market-specific attribute can be assigned to a party, to a securities account and to a security.

To configure a new market-specific attribute, carry out the business scenarios in the predefined order:

Business Scenarios

- 1 Create a new attribute domain [▶]
- 2 Create a new market-specific attribute [▶]

3.4.1.1 Create a New Market-Specific Attribute

Context of Usage

This business scenario describes how to create a new market-specific attribute.

You can create a new market-specific attribute to enter non-standard information for your securities, securities accounts and parties.

Creating a new market-specific attribute is mandatory for the configuration of a market-specific attribute.

Before you create a new market-specific attribute value, check whether the relevant attribute domain exists and is active.

This business scenario is not relevant for CSD participants, external CSDs or payment bank users.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- Create market-specific attribute
- Market-specific attribute list query

Reference

Further information on screens involved can be found in the screen reference part:

- *Market-specific attributes – search/list* screen [▶]
- *Market-specific attribute – new/edit* screen [▶]

Instructions

1. Go to the *market-specific attributes – search/list* screen:
T2S >> Market-Specific Configuration >> Market-Specific Attributes >> Search
2. Click on the *new* button.
⇒ The *market-specific attribute – new* screen is displayed.
3. Enter all mandatory information in the 'Market-Specific Attribute' frame.
4. Select if the market-specific attribute is unique or mandatory.

If you create a new unique market-specific attribute, you can only assign one value of the market-specific attribute to the relevant CRDM object (party/security/securities account) indicated by the object type.

If you create a new mandatory market-specific attribute, you must assign one or more values to all the relevant reference data objects (indicated by the 'Attribute Type' field) belonging to your data scope.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

5. Click on the *submit* button.
➡ The new market-specific attribute has been created.

3.4.1.2 Create a New Attribute Domain

Context of Usage	<p>This business scenario describes how to create a new attribute domain.</p> <p>Creating a new attribute domain is mandatory for the configuration of a market-specific attribute.</p> <p>The creation of an attribute domain requires the name and the description of the attribute domain and the format rules that apply to all the values of the attribute domain. These rules allow you to define the related values in two different ways: a free text definition or a predefined list of values.</p> <p>During the creation of an attribute domain it is possible to define the actual list of all possible values for the attribute domain. These values are the only possible values that can be assigned to the related market-specific attribute.</p> <p>Before you create a new attribute domain, check whether it already exists.</p> <p>The business scenario is not relevant for CSD participants, external CSDs or payment bank users.</p>
Privileges	<p>To carry out this business scenario, you need the following privileges [▶]:</p> <ul style="list-style-type: none"> ▶ Attribute domain list query ▶ Create attribute domain
Reference	<p>Further information on screens involved can be found in the screen reference part:</p> <ul style="list-style-type: none"> ▶ <i>Attribute domains – search/list</i> screen [▶] ▶ <i>Attribute domain – new/edit</i> screen [▶]
Instructions	<ol style="list-style-type: none"> 1. Go to the <i>attribute domains – search/list</i> screen: Common>> General Configuration Parameters >> Attribute Domains >> Search 2. Click on the <i>new</i> button. ⇒ The <i>attribute domain – new</i> screen is displayed. 3. Enter all mandatory information in the 'Attribute Domain' frame. 4. You can define attribute values from the list in the 'Attribute values' frame by selecting the respective row(s) or you can add new attribute domain values by clicking on the <i>submit changes</i> button. 5. This optional step defines the list of all the possible values for the attribute domain. 6. These values are the only one you can input as a market-specific attribute of the new created object, wherein the only possible object types are securities, securities account and parties.

7. In case you do not enter any value in the frame 'Attribute Values', CRDM considers as valid for this attribute domain any value matching the format rules defined in the previous step.

Repetition

To add more attribute values, repeat step 4.
You can add up to 10 attribute values.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.
To cancel the process and return to the previous screen, click on the *cancel* button.

8. Click on the *submit* button.

➔ The new attribute domain has been created.

3.4.2 Assignment of a Market-Specific Attribute Value

Overview

This business package describes the assignment of a market-specific attribute value.

In addition to the standard set of reference data information, a market-specific attribute value can be assigned to a party, securities account or a security. Moreover, a market-specific attribute value can be assigned to a restriction type, which has been previously configured to accept it.

For the assignment of a market-specific attribute value, carry out the business scenarios in the predefined order and choose the business scenario relevant to you whenever options are given

Business Scenarios

- Create a new attribute domain [►]
- Create a new market-specific attribute [►]
- Assign a market specific attribute value to a:
 1. Party [►]
 2. Securities Account [►]
 3. Security [►]

3.4.2.1 Assign a Market-Specific Attribute Value to a Party

Context of Usage

A CSD or a central bank can define some specific attributes in addition to the standard set of reference data for its parties.

Assigning a market-specific attribute value is mandatory for all parties belonging to your entity, if the market-specific attribute has been defined as mandatory. It is only necessary, if you have not already assigned a market-specific attribute value when creating a new party.

Before you assign a market-specific attribute value, check whether the relevant party exists and is active.

This business scenario is not relevant for CSD participants and payment bank users.

Privileges

To carry out this business scenario, you need the following privileges [Book 1]:

- Party list query
- Create party
- Update party

Reference

Further information on screens involved can be found in the screen reference part:

- *Parties – search/list* screen [Book 1]
- *Party - details* screen [Book 1]
- *Party – new/edit* screen [Book 1]

Instructions

1. Go to the *parties – search/list* screen:
Common>> Parties >> Parties >> Search

Hint

If you want to assign a new market-specific attribute value without checking the existing ones, proceed with step 7.

2. Enter all search criteria known to you about the party to which you want to assign the market-specific attribute value.
3. Click on the search button.
 - ⇒ A list containing the search results is displayed on the screen.
 - ⇒ If the search retrieves a single party, the *party – details* screen is displayed directly. Proceed with step 6.
4. Select the relevant party.
5. Click on the details button.
 - ⇒ The *party – details* screen is displayed.
6. Check the list of the market-specific attributes already assigned to the party.
7. Click on the edit button.
 - ⇒ The *party – edit* screen is displayed.
8. Click on add row button under the frame 'Market-Specific Attribute'.
9. Enter all the mandatory information in the 'Market-Specific Attributes' frame.
10. If the market-specific attribute has been created for an attribute domain with predefined values only those predefined values are allowed, otherwise you can enter any value matching the format rules defined in the attribute domain.
11. If the market-specific attribute has been defined as unique you can only enter one value.
12. Click on the *submit changes* button.
 - ⇒ A new market-specific attribute has been added to the list.

Repetition

To add more market-specific attributes, repeat steps 8, 9 and 10.

You can add up to 10 market-specific attribute values.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

13. Click on the *submit* button.

- ➔ The new market-specific attribute value(s) has (have) been assigned to the selected party.

3.4.2.2 Assign a Market-Specific Attribute Value to a Security

Context of Usage

This business scenario describes how to add an attribute for internal purposes to the securities belonging to your data scope.

Assigning a market-specific attribute value to a security is mandatory for all securities belonging to your entity, if the market-specific attribute has been defined as mandatory. It is only necessary, if you have not already assigned a market-specific attribute value when creating a new security.

Before you assign a market-specific attribute value, check whether the relevant security exists and is active.

This business scenario is not relevant for CB, payment bank and CSD participant users.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- ISIN list query
- Create security
- Update security

Reference

Further information on screens involved can be found in the screen reference part:

- *Securities – search/list* screen [▶]
- *Security - details* screen [▶]
- *Security – new/edit* screen [▶]

Instructions

1. Go to the *securities – search/list* screen:
T2S >> Securities >> Securities >> Search

Hint

If you want to assign a new market-specific attribute value without checking the existing ones, proceed with step 7.

2. Enter all search criteria known to you about the security to which you want to assign the market-specific attribute value.
3. Click on the search button.
 - ⇒ A list containing the search results is displayed on the screen.
 - ⇒ If the search retrieves only one security, the *security – details* screen is displayed directly. Proceed with step 6.
4. Select the relevant security.
5. Click on the *details* button.
 - ⇒ The *security – details* screen is displayed.
6. Check the list of the market-specific attributes already assigned to the security.
7. Click on the *edit* button.
 - ⇒ The *security – new/edit* screen is displayed.
8. Click on the *add row* button under the frame 'Market-Specific Attribute'.
9. Enter all the mandatory information in the 'Market-Specific Attributes' frame.
10. If the market-specific attribute has been created for an attribute domain with predefined values only those predefined values are allowed, otherwise you can enter any value matching the format rules defined in the attribute domain.
11. If the market-specific attribute has been defined as unique you can only enter one value.
12. Click on the *submit changes* button.
 - ⇒ A new market-specific value has been added to the list.

Repetition

To add more market-specific values, repeat steps 8, 9 and 10.

You can add up to 10 market-specific attribute values.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

13. Click on the *submit* button.

- ➔ The new market-specific attribute value(s) has(have) been assigned to the selected security.

3.4.2.3 Assign a Market-Specific Attribute Value to a Securities Account

Context of Usage	<p>This business scenario describes how to add an attribute for internal purposes to the securities accounts belonging to your data scope.</p> <p>Assigning a market-specific attribute value to a securities account is mandatory if the market-specific attribute has been defined as mandatory. It is only necessary, if you have not already assigned a market-specific attribute value when creating a new securities account.</p> <p>Before you assign a market-specific attribute value, check whether the relevant securities account exists and is active.</p> <p>This business scenario is not relevant for CB, payment bank and CSD participant users.</p>
Privileges	<p>To carry out this business scenario, you need the following privileges [▶]:</p> <ul style="list-style-type: none"> ■ Securities account list query ■ Securities account reference data query ■ Create securities account ■ Update securities account
Reference	<p>Further information on screens involved can be found in the screen reference part:</p> <ul style="list-style-type: none"> ■ <i>Securities accounts – search/list</i> screen [▶] ■ <i>Securities account – details</i> screen [▶] ■ <i>Securities account – new/edit</i> screen [▶]
Instructions	<ol style="list-style-type: none"> 1. Go to the <i>securities accounts – search/list</i> screen: T2S >> Securities >> Securities >> Search

Hint

If you want to assign a new market-specific attribute value without checking the existing ones, proceed with step 7.

2. Enter all search criteria known to you about the securities account to which you want to assign the market-specific attribute value.
3. Click on the *search* button.
 - ⇒ A list containing the search results is displayed on the screen.

- ⇒ If the search retrieves only one securities account, the *securities account – details* screen is displayed directly. Proceed with step 6.
- 4. Select the relevant securities account.
- 5. Click on the *details* button.
 - ⇒ The *securities account – details* screen is displayed.
- 6. Check the list of market-specific attributes which are already assigned to the securities account.
- 7. Click on the *edit* button.
 - ⇒ The *securities account – new/edit* screen is displayed.
- 8. Click on the *add row* button under the 'Market-Specific Attribute' frame.
- 9. Enter all the mandatory information in the 'Market-Specific Attributes' frame.
- 10. If the market-specific attribute has been created for an attribute domain with predefined values, only those predefined values are allowed, otherwise you can enter any value matching the format rules defined in the attribute domain.
- 11. If the market-specific attribute has been defined as unique you can only enter one value.
- 12. Click on the *submit changes* button.
 - ⇒ A new market-specific attribute has been added to the list.

Repetition

To add more market-specific attributes, repeat steps 8, 9 and 10.
You can add up to 10 market-specific attribute values.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

- 13. Click on the *submit* button.
 - ➡ The new market-specific attribute value(s) has(have) been assigned to the selected securities account.

3.5 Restriction Types

3.5.1 Configuration of a New Restriction Type

Overview

This business package describes the configuration of a new restriction.

Restriction types are attributes that define the specific processing characteristics for the object they apply to for a given time period based on a set of rules.

Each Actor can have many active rule sets at any given point in time. Each rule set can include many rules. Each rule can include many groups of parameters. The maximum overall number of groups of parameters for the active rule sets is 5,000. Each rule can include many parameters. Within each rule, each parameter can be linked to many distinct values. The maximum number of distinct parameters within the active rule sets is 100. Parameters for restriction types configuration can also include market specific attributes. In this case, the maximum number of market-specific attributes, applicable for restriction type's configurations, is 10 for all the restriction types of any given CSD and a maximum of five per restriction type rule. These two limits cover all types of market-specific attributes (i.e. party market-specific attributes, securities market-specific attributes and securities account market-specific attributes). So, for example, if a CSD selects three party market-specific attributes to configure its restriction types, then the same CSD can select no more than 7 (i.e. 10-3) security or securities account market-specific attributes to configure its restriction types. Similarly, if a CSD selects two party market-specific attributes to configure one specific restriction type rule, then the same CSD can select no more than three security or securities account market-specific attributes to configure the same restriction type rule.

To configure a new restriction type, carry out the following business scenarios in the predefined order and choose the business scenario which is relevant to you whenever options are given:

- | | |
|---------------------------|--|
| Business Scenarios | <ul style="list-style-type: none"> ■ Create a new restriction type [▶] ■ Configure a new restriction type rule set [▶] |
|---------------------------|--|

3.5.1.1 Create a New Restriction Type

Context of Usage

This business scenario describes how to create a new restriction type. A restriction type indicates attributes that define the specific processing characteristics for the object they apply to for a given time period. There is a set of harmonised restriction types defined at system level by the Service operator.

To each available restriction type, you can set up a set of rules as conditions to be fulfilled before triggering the restriction. In addition, you can set up your own restriction type.

This business scenario is not relevant for CSD participant and payment bank users.

Privileges

To carry out this business scenario, you need the following privileges [►]:

- Market-specific restriction list query
- Create restriction type
- Update restriction type

Reference

Further information on screens involved can be found in the screen reference parts:

- *Restriction types - search/list* screen [Book 1]
- *Restriction type - new/edit* screen [Book 1]

Instructions

1. Go to the *restriction types – search/list* screen:
Common >> Market-Specific Configuration >> Restriction Types >> Search
2. Click on the *new* button.
⇒ The *restriction type – new* screen is displayed.
3. Enter all mandatory information in the 'Restriction Type' frame.

Notice

If the restriction processing type is set to 'Rejection', the object restriction type can only be set to 'Settlement Instruction', 'Intra-Position Movement Instruction' or 'Intra-Balance Movement Instruction'.

If the restriction processing type is set to 'CSD Validation Hold', the object restriction type can only be set to 'Settlement Instruction'.

If the restriction processing type is set to 'Blocking', the object restriction type can only be set to 'Party', 'Security', 'Securities Account', 'T2S Dedicated Cash Account', 'External RTGS Account', 'Cash Balance' or 'Securities Positions'.

If the restriction processing type is set to 'Reservation', 'Deliverable' or 'CoSD Blocking', the object restriction type can only be set to 'Cash Balance' or 'Securities Position'.

If the restriction processing type is set to 'Earmarking', 'Collateralised' or 'Earmarking for Auto-Collateralisation', the object restriction type can only be set to 'Securities Positions'.

If the specified restriction processing type is 'Rejection' or 'CSD Validation Hold', the specified 'Valid from' date must be later than the date following the current

date. In all other cases the specified 'Valid from' date must be later than the current date.

In case the value 'Positive' is selected in the 'Positive/Negative Parameter Set' field, the restriction is applied in case the linked rules are satisfied.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

4. Click on the *submit* button.

➡ A new restriction type has been created.

3.5.1.2 Configure a Restriction Type Rules

Context of Usage

This business scenario describes how to configure a restriction type rule. The configuration of a rule allows you to define the criteria according to which T2S checks whether a restriction type has to be triggered or not. These criteria are expressed on the base of a predefined set of parameter types different for each case. In addition to these predefined parameter types, you can configure a market-specific attribute previously created.

You need to configure a restriction type rule set for two different reasons:

- Acceptance/rejection of a settlement instruction at business validation level
- Intraday restriction on parties, securities and securities account, external RTGS accounts and T2S dedicated cash accounts to block settlement on the relevant reference data object

Before you configure a restriction type rule, you have to create a new restriction type.

This business scenario is optional for the configuration of a new restriction type, since a restriction type can exist without any related rule set. However, a case one restriction type without any rule attached has not any effect in the system.

For each rule you must define at least one parameter. In addition you can configure at least one group of values defined for each parameter. If you define more than one rule for a specific restriction type, these rules will be applied in a specifically defined sequential order.

This business scenario is not relevant for CSD participant and payment bank users.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- Market-specific restriction type rule set list query
- Market-specific restriction type list query
- Create restriction type rule
- Delete restriction type rule
- Delete restriction type
- Update restriction type rule

Reference

Further information on screens involved can be found in the screen reference part:

- *Restriction types – search/list* screen [Book 1]
- *Restriction types – details* screen [Book 1]
- *Restriction types – new/edit* screen [Book 1]

Instructions

1. Go to the *restriction types – search/list* screen:
Common >> Market-Specific Configuration >> Restriction Types >> Search
2. Enter all search criteria known to you about the restriction type for which you want to configure a restriction type rule.
3. Click on the *search* button.
⇒ A list containing the search results is displayed on the screen.
4. Select the relevant restriction type by clicking on an entry in the list.
5. Click on the *details* button.
⇒ The *restriction type - details* screen is displayed.
6. Click on the *add Rule* button.
⇒ The *restriction type rule - new* screen is displayed.

7. Enter the relevant information in the 'Restriction Type Rule' frame.
8. Click on the *add group* button.

9. Enter all relevant information in order to define a predicate and click *Ok* button.

10. Click on the *submit changes* icon.

⇒ A new group has been added.

Repetition

To create an additional new group, repeat steps 8, 9 and 10.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

11. To add a market-specific attribute value among the parameters, click on the *new group* button.

⇒ The 'New Type' prompt is displayed.

12. Select MSA from the Category drop-down menu.

13. Click on the *OK* button.

- ⇒ The *restriction type rule – new/edit* screen is displayed.
- ⇒ The selected market-specific attribute has been added to the parameters.

Repetition

To enter a new rule with the selected market-specific attribute, repeat steps 8, 9 and 10.

14. Click on the *submit* button.

- ➔ The new restriction type rule set has been created.

3.5.2 Assignment of a Restriction Type

Overview

This business package describes the assignment of a restriction type.

You can assign a restriction type to a party, securities account, security, T2S dedicated cash account or external RTGS account. Each CSD and each central bank can define its own restriction types in addition to harmonised restriction types defined at system level by a Service operator.

To assign a restriction type, carry out the business scenario relevant to you from the list below.

Business Scenario

- Assign a restriction type to a party [▶]
- Assign a restriction type to a security [▶]
- Assign a restriction type to a securities account [▶]
- Assign a restriction type to a T2S dedicated cash account [▶]
- Assign a restriction type to an external RTGS account [▶]

3.5.2.1 Assign a Restriction Type to a Party

Context of Usage

This business scenario describes how to assign a restriction type to a party in order to block it from settlement, according to the list of parameters you specified in the associated rule set.

Each CSD and each CB can define its own restrictions; these can then be applied to a party in addition to the harmonised restriction types defined at system level by the Service Operator.

If you do not specify any rules or parameters, the blocking is applied to all the transactions of the relevant party.

Before you assign a restriction type to a party, you have to create the restriction and configure it through a proper set of rules that define all the criteria under which the restriction is triggered.

-
- Privileges** To carry out this business scenario, you need the following privileges [▶]:
- Party list query
 - Create party
 - Update party
 - Market-specific restriction list query
- Reference** Further information on screens involved can be found in the screen reference part:
- *Parties – search/list* screen [
 - *Party – details* screen [
 - *Party - new/edit* screen [
- Instructions**
1. Go to the *parties – search/list* screen:
Common >> Parties >> Parties >> Search
 2. Enter all search criteria known to you about the party to which you want to assign the restriction.
 3. Click on the *search* button.
 - ⇒ A list containing the search results is displayed on the screen.
 - ⇒ If the search retrieves a single party, the *party – details* screen is displayed directly. Proceed with step 6.
 4. Select the relevant party by clicking on an entry in the list.
 5. Click on the *details* button.
 - ⇒ The *party – details* screen is displayed.
 6. Check the list of restriction types already assigned to the party.
 7. Click on the *edit* button.
 - ⇒ The *party – edit* screen is displayed.
 8. Enter all the mandatory information in the 'Restrictions' frame.
 9. Click on the *add row* button.
 - ⇒ A new restriction type has been added to the list.

Repetition

To add more restrictions, repeat steps 8 and 9.

You can add up to 10 restriction types.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

10. Click on the *submit* button

➔ The new restriction(s) has (have) been assigned to the selected party.

3.5.2.2 Assign a Restriction Type to a Security

Context of Usage

This business scenario describes how to assign a restriction type to a security in order to block it from settlement, according to the list of parameters specified in the associated rule set. In case no parameters/rules are specified, T2S blocks all settlements on the given security.

CSD users can assign a restriction type to a security for their relevant participants. CSD participants are entitled to check the restrictions that are currently applied to their own security.

A security can be restricted by different CSDs. A CSD participant can see only the restriction imposed by the relevant CSD.

This business scenario is not relevant for CB and payment bank users.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- ISIN list query
- Create security
- Update security

Reference

Further information on screens involved can be found in the screen reference part:

- *Securities – search/list* screen [▶]
- *Security – details* screen [▶]
- *Security – new/edit* screen [▶]

Instructions

1. Go to the *securities – search/list* screen:
T2S >> Securities >> Securities >> Search

Hint

If you want to assign a new restriction type without checking the existing ones, proceed with step 7.

2. Enter all search criteria known to you about the security to which you want to assign the restriction.
3. Click on the *search* button.
 - ⇒ A list containing the search results is displayed on the screen.
 - ⇒ If the search retrieves only one security, the *security – details* screen is displayed directly. Proceed with step 6.
4. Select the relevant security.
5. Click on the *details* button.
 - ⇒ The *security - details* screen is displayed.
6. Check the list in the “Restriction” frame in the ‘Restriction Type’ column of the restriction types already assigned to the security.
7. Click on the *edit* button.
 - ⇒ The *security – new/edit* screen is displayed.
8. Enter all the mandatory information in the ‘Restriction’ frame
9. Click on the add row button.
 - ⇒ A new restriction type has been added to the list.

Repetition

To add more restriction types, repeat steps 8 and 9.
You can add up to 10 restriction types.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

10. Click on the *submit* button.
 - ➡ The new restriction(s) has (have) been assigned to the selected security.

3.5.2.3 Assign a Restriction Type to a Securities Account

Context of Usage

This business scenario describes how to assign a restriction type to a securities account. You can assign a restriction type to a securities account in order to block it from settlement according to the list of parameters specified in the associated rule set. In case no parameters/rules are specified, T2S blocks all settlements on the given account.

CSD users can assign a restriction type to a securities account for their relevant participants. CSD participants are entitled to check the restrictions that are currently applied to their own securities account.

This business scenario is not relevant for CB and payment bank users.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- ▶ Create securities account
- ▶ Update securities account
- ▶ Delete securities account

Reference

Further information on screens involved can be found in the screen reference part:

- ▶ *Securities accounts – search/list* screen [▶]
- ▶ *Securities account – details* screen [▶]
- ▶ *Securities account – new/edit* screen [▶]

Instructions

1. Go to the *securities accounts – search/list* screen:
T2S >> Securities Account >> Securities Accounts >> Search
2. Enter the search criteria known to you about the securities account to which you want to assign the market-specific attribute value.
3. Click on the *search* button.
 - ⇒ A list containing the search results is displayed on the screen.
 - ⇒ If the search retrieves only one securities account the *securities account – details* screen is displayed. Proceed with step 6.
4. Select the relevant securities account by clicking on an entry in the list.

Hint

If you want to assign a new restriction type without checking the existing ones, proceed with step 7.

5. Click on the *details* button.
 - ⇒ The *securities account - details* screen is displayed.
6. Check the list under the 'Restriction Type' column field of the restrictions types already assigned to the securities account.
7. Click on the *edit* button.
 - ⇒ The *securities account – new/edit* screen is displayed.
8. Enter all the mandatory information in the 'Restrictions' frame.
9. Click on the *add row* button.
 - ⇒ A new restriction type has been added to the restriction list.

Repetition

To add more restriction types, repeat steps 8 and 9.

You can add up to 10 restrictions.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

10. Click on the *submit* button.

- ➔ The new restriction type(s) has (have) been assigned to the selected securities account.

3.5.2.4 Assign a Restriction Type to a T2S Dedicated Cash Account

Context of Usage

This business scenario describes how to assign a restriction type to a T2S dedicated cash account.

Restriction types are attributes that define the specific processing characteristics for the T2S dedicated cash account, that apply for a given time period. In this case (when the object type is a T2S dedicated cash account) the only restriction that can be applied is the blocking of the selected T2S dedicated cash account from settlement, according to the list of parameters you have specified in the associated rule set. In case you did not specify any parameters, all settlement instructions are blocked on the given T2S dedicated cash account.

Each CB can define its own restrictions; these can then be applied to a dedicated cash account in addition to the harmonised restriction types defined at system level by the T2S operator.

If you do not specify any rules, the blocking is applied to all the transactions of the relevant T2S dedicated cash account.

Before you assign a restriction type to a dedicated cash account, you have to create the restriction and if necessary you have to configure it through a proper set of rules that define all the criteria under which the restriction is triggered.

This business scenario is not relevant for CSD, CSD participant or external CSD users.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- Cash Account list query
- Create Cash Account

- Update Cash Account
- Cash Account reference data query

Reference

Further information on screens involved can be found in the screen reference part:

- *Cash Accounts – search/list* screen [Book 1]
- *Cash Account – details* screen [Book 1]
- *Cash Account - new/edit* screen [Book 1]

Instructions

1. Go to the *Cash Accounts – search/list* screen:
Common >> Cash >> Cash Accounts >> Search
2. Enter all search criteria about the T2S dedicated cash account to which you want to assign the restriction.
3. Click on the *search* button.
 - ⇒ A list containing the search results is displayed on the screen.
 - ⇒ If the search retrieves a single T2S dedicated cash account, the *Cash Account – details* screen is displayed directly. Proceed with step 6.
4. Select the relevant T2S dedicated cash account.
5. Click on the *details* button.
 - ⇒ The *T2S dedicated cash account – details* screen is displayed.
6. Check the list of restriction types already assigned to the T2S dedicated cash account.
7. Click on the *edit* button.
 - ⇒ The *Cash account – edit* screen is displayed.
8. Click on the *add row* button.
9. Enter all the mandatory information in the 'Restrictions' frame.

10. Click on the *submit changes* button.
 - ⇒ A new restriction has been added to the list.

Repetition

To add more restriction types, repeat steps 8, 9 and 10.

You can add up to 10 restriction types.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

11. Click on the *submit* button.

- ➔ The new restriction(s) has (have) been assigned to the selected T2S dedicated cash account.

3.5.2.5 Assign a Restriction Type to an external RTGS Account

Context of Usage

This business scenario describes how to assign a restriction type to an external RTGS account.

Restriction types are attributes that define the specific processing characteristics for the external RTGS account which they apply to for a given time period. In this case (when the object type is an external RTGS account), the only restriction processing that you can apply is the blocking of the selected external RTGS account from settlement, according to the list of parameters you have specified in the associated rule set. If you did not specify any parameters, all liquidity transfer are blocked on the given RTGS account.

Each CB can define its own restrictions; these can then be applied to an external RTGS account in addition to the harmonised restriction types defined at system level by the T2S operator.

If you do not specify any rules, the blocking is applied to all the transactions of the relevant external RTGS cash account.

Before you assign a restriction type to an external RTGS account, you have to create the restriction and if necessary you have to configure it through a proper set of rules that define all the criteria under which the restriction is triggered.

This business scenario is not relevant for CSD and CSD participant users.

Privileges

To carry out this business scenario, you need the following privileges [►]:

- External RTGS account list query
- External RTGS account details query

- | Create external RTGS account
- | Update external RTGS account

Reference

Further information on screens involved can be found in the screen reference part:

- | *External RTGS accounts – search/list* screen [▶]
- | *External RTGS account – details* screen [▶]
- | *External RTGS account - new/edit* screen [▶]

Instructions

1. Go to the *external RTGS accounts – search/list* screen:
Common >> Cash >> External RTGS Account >> External RTGS Account >> Search
2. Enter all search criteria known to you about the external RTGS account to which you want to assign the restriction.
3. Click on the *search* button.
 - ⇒ A list containing the search results is displayed on the screen.
 - ⇒ If the search retrieves a single account, the *external RTGS account – details* screen is displayed. Proceed with step 6.
4. Select the relevant external RTGS account.
5. Click on the *details* button.
 - ⇒ The *external RTGS account – details* screen is displayed.
6. Check the list of restriction types already assigned to the external RTGS account.
7. Click on the *edit* button.
 - ⇒ The *external RTGS account – edit* screen is displayed.
8. Enter all the mandatory information in the 'External RTGS Account Restrictions' frame.
9. Click on the *submit changes* button in the 'Options' column.
 - ⇒ A new restriction has been added to the list.

Repetition

To add more restrictions, repeat steps 8 and 9.

You can add up to 10 restriction types.

Alternatives

To set all fields to default and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

10. Click on the *submit* button.

- ➔ The new restriction(s) has (have) been assigned to the selected external RTGS account.

3.6 Reference Data Configuration for the Settlement Process

3.6.1 Configuration for Intra-CSD Settlement

Overview

This business package describes the configuration for an intra-CSD settlement.

Intra-CSD settlement is defined as the settlement between participants that belong to the same CSD. In case the CSD is the issuer CSD for that specific security, it must configure itself as issuer CSD and setting up a securities CSD link.

To configure for intra-CSD settlement, carry out the following business scenarios in the predefined order.

Business Scenarios

- Create a new participant [▶]
- Create a new securities account [▶]
- Configure security CSD links [▶]

3.6.1.1 Create a New Participant

Context of Usage

This business scenario describes how to create a new participant. Each CSD is responsible for the creation of the party reference data for their CSD participants and for other CSDs that are external to T2S, whereas each CB is responsible for the creation of the party reference data for their payment banks.

Creating a new participant is mandatory for the administration of participants. It is optional for the configuration for intra-CSD settlement, for the configuration for a central bank, for the configuration for central bank collateralisation and for the configuration for client collateralisation.

Before you start, check whether the participant has not already been created by someone else. Also, make sure that the party BIC you want to use for the new participant has been created in the BIC directory. Finally you have to check if a mandatory market-specific attribute is required.

Privileges

To carry out this business scenario, you need the following privileges [Book 1]:

■ Party list query

■ Create Party

Reference

Further information on screens involved can be found in the screen reference part:

■ *Parties – search/list* screen [Book 1]

■ *Party – new/edit* screen [Book 1]

Instructions

1. Go to the *parties – search/list* screen:
Common >> Parties >> Parties >> Search
2. Click on the *new* button.
⇒ The *party – new* screen is displayed.
3. Enter all mandatory information in the 'Party', 'Address' and 'Auto-Collateralisation Rules' frames.
If the party type is 'CSD participant', the 'Address' frame is not available.
The 'Auto-Collateralisation Rule' frame is only available for the 'Payment Bank' party type.
4. To add a technical address, market-specific attribute or restriction, enter all mandatory information in the 'Technical Addresses', 'Market-Specific Attributes' and 'Restrictions' frames.
The 'Market-Specific Attributes' frame is mandatory only if the market-specific attribute is defined as mandatory.
At least one technical address has to be defined.
5. Click on the *add row* button.
⇒ A new technical address, market-specific attribute or restriction has been added to the list.

Repetition

To add more technical addresses, market-specific attributes or restrictions, repeat steps 4 and 5.

You can add up to 10 technical addresses, market-specific attributes or restrictions.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

6. Click on the *submit* button

➔ The new participant has been created.

3.6.1.2 Create a New Securities Account

Context of Usage

This business scenario describes how to create a new securities account. Each CSD is responsible for opening securities accounts in its books for itself and all its participants. T2S envisages the following types of securities accounts:

- CSD participant account, i.e. the ordinary securities account used for the settlement of instructions
- CSD mirror account, CSD omnibus account and inter-CSD account, all used for cross-CSD settlement
- Issuance account, i.e. the securities account reflecting the holdings of the participants of the issuer CSD for a given financial instrument. The issuer CSD can specify the issuance account for any given security when setting up its securities CSD links configuration for the same security
- T2S technical offset account, i.e. a specific technical account foreseen for settlement in the direct holding markets only

T2S provides the possibility to define a time-dependent relationship between CSD participants and securities accounts. This means that the CSD can change the relationship between the CSD participant and the securities accounts. Only one CSD must be linked to the securities account at any point in time. There is no limit on the number of securities accounts a single party can own within the same CSD.

Before you start, check whether the securities account has not already been created by someone else. Finally you have to check if a mandatory market-specific attribute is mandatory.

This business scenario is not relevant for CB and payment bank users.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- Securities account list query
- Create securities account
- Update securities account

Reference

Further information on screens involved can be found in the screen reference part:

- *Securities accounts – search/list* screen [▶]
- *Securities account – new/edit* screen [▶]

Instructions

1. Go to the *securities accounts – search/list* screen:
T2S >> Securities Accounts >> Securities Account >> Search

2. Click on the *new* button.
⇒ The *securities account – new* screen is displayed.
3. Enter all mandatory information in the 'Securities Account' frame.
4. To add a market-specific attribute or a restriction, enter all mandatory information in the 'Market-Specific Attributes' and 'Restrictions' frames.
5. Click on the *add row* button.

Repetition

To add more market-specific attributes or restrictions, click on the *submit changes button* and repeat steps 4 and 5.

You can add up to 10 market-specific attributes or restrictions.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

6. Click on the *submit* button.
➔ The new securities account has been created.

3.6.1.3 Configure Security CSD Links

Context of Usage

This business scenario describes how to configure a security CSD link in order to allow the securities' eligibility for cross-CSD settlement, Intra-CSD settlement and external CSD settlement.

All other investor CSDs that want to settle a security issued by another CSD must define their technical issuer CSD for that security. The technical issuer CSD is the CSD where the investor CSD has opened the omnibus account. It is possible to define as technical issuer both the issuer CSD (direct link configuration) or another investor CSD (relayed link configuration). For a complete direct link configuration it is necessary to define only the issuer CSD first and then to create another security CSD link, between the previously defined issuer CSD (referred to as technical issuer) and the investor CSD. If the link is a direct one, the issuer CSD can decide to specify one or more issuance accounts. If more than one issuance account is specified, the issuer CSD has to indicate the primary account. Finally, by means of the security maintenance flag it is possible to define a CSD as maintainer for the given financial instrument (security maintaining entity).

Configuring security CSD links is mandatory for the configuration of a cross-CSD settlement, for the configuration of an external-CSD settlement and for the administration of securities.

Before you configure security CSD links, check whether the ISIN and the investor CSD exist. If you are configuring a security CSD link for an ISIN maintained by another CSD, you have to check if you have already added all the mandatory market-specific attributes to the relevant security.

This business scenario is not relevant for CSD participants, CB and payment bank users.

Privileges To carry out this business scenario, you need the following privileges [▶]:

- Securities CSD link query
- Create security CSD link
- Update security CSD link

Reference Further information on screens involved can be found in the screen reference part:

- *Security CSD links – search/list* screen [▶]
- *Security CSD link – new/edit* screen [▶]

Instructions

1. Go to the *security CSD links – search/list* screen:
T2S >> Securities >> Security CSD Links >> Search
2. Click on the *new* button.
⇒ The *security CSD link – new* screen is displayed.
3. Enter all mandatory information in the 'CSD Link' frame.
4. To add an issuance account click on the *add row* button in 'Issuance Account' frame.
5. Enter all mandatory information in the available fields of the 'Issuance Account' frame.
6. Click on the *submit changes* button.
⇒ The new issuance account has been added to the list.

Repetition

To add more issuance accounts repeat steps 4 to 6.

You can add up to 10 technical addresses, market-specific attributes or restrictions.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

7. Click on the *submit* button.

➔ The security CSD link has been configured.

3.6.2 Configuration for Cross-CSD Settlement

Overview

This business package describes the configuration for cross-CSD settlement.

Whenever a transaction involves more than one CSD, you have to configure the security CSD links, CSD account links and eligible counterpart CSD entities.

To configure for cross-CSD settlement, carry out the following business scenarios in the predefined order.

Business Scenario

- Create a new Securities Account [▶]
- Configure security CSD links [▶]
- Configure CSD account links [▶]
- Configure Eligible Counterpart CSD [▶]

3.6.2.1 Create a New Securities Account

Context of Usage

This business scenario describes how to create a new securities account. Each CSD is responsible for opening securities accounts in its books for itself and all its participants. T2S envisages the following types of securities accounts:

- CSD participant account, i.e. the ordinary securities account used for the settlement of instructions
- CSD mirror account, CSD omnibus account and inter-CSD account, all used for cross-CSD settlement
- Issuance account, i.e. the securities account reflecting the holdings of the participants of the issuer CSD for a given financial instrument. The issuer CSD can specify the issuance account for any given security when setting up its securities CSD links configuration for the same security
- T2S technical offset account, i.e. a specific technical account foreseen for settlement in the direct holding markets only

T2S provides the possibility to define a time-dependent relationship between CSD participants and securities accounts. This means that the CSD can change the relationship between the CSD participant and the securities accounts. Only one

CSD must be linked to the securities account at any point in time. There is no limit on the number of securities accounts a single party can own within the same CSD.

Before you start, check whether the securities account has not already been created by someone else. Finally you have to check if a mandatory market-specific attribute is mandatory.

This business scenario is not relevant for CB and payment bank users.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- Securities account list query
- Create securities account
- Update securities account

Reference

Further information on screens involved can be found in the screen reference part:

- *Securities accounts – search/list* screen [▶]
- *Securities account – new/edit* screen [▶]

Instructions

1. Go to the *securities accounts – search/list* screen:
T2S >> Securities Accounts >> Securities Account >> Search
2. Click on the *new* button.
⇒ The *securities account – new* screen is displayed.
3. Enter all mandatory information in the 'Securities Account' frame.
4. To add a market-specific attribute or a restriction, enter all mandatory information in the 'Market-Specific Attributes' and 'Restrictions' frames.
5. Click on the *add row* button.

Repetition

To add more market-specific attributes or restrictions, click on the *submit changes button* and repeat steps 4 and 5.

You can add up to 10 market-specific attributes or restrictions.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

6. Click on the *submit* button.

➔ The new securities account has been created.

3.6.2.2 Configure Security CSD Links

Context of Usage	<p>This business scenario describes how to configure a security CSD link in order to allow the securities' eligibility for cross-CSD settlement, Intra-CSD settlement and external CSD settlement.</p> <p>All other investor CSDs that want to settle a security issued by another CSD must define their technical issuer CSD for that security. The technical issuer CSD is the CSD where the investor CSD has opened the omnibus account. It is possible to define as technical issuer both the issuer CSD (direct link configuration) or another investor CSD (relayed link configuration). For a complete direct link configuration it is necessary to define only the issuer CSD first and then to create another security CSD link, between the previously defined issuer CSD (referred to as technical issuer) and the investor CSD. If the link is a direct one, the issuer CSD can decide to specify one or more issuance accounts. If more than one issuance account is specified, the issuer CSD has to indicate the primary account. Finally, by means of the security maintenance flag it is possible to define a CSD as maintainer for the given financial instrument (security maintaining entity).</p> <p>Configuring security CSD links is mandatory for the configuration of a cross-CSD settlement, for the configuration of an external-CSD settlement and for the administration of securities.</p> <p>Before you configure security CSD links, check whether the ISIN and the investor CSD exist. If you are configuring a security CSD link for an ISIN maintained by another CSD, you have to check if you have already added all the mandatory market-specific attributes to the relevant security.</p> <p>This business scenario is not relevant for CSD participants, CB and payment bank users.</p>
Privileges	<p>To carry out this business scenario, you need the following privileges [▶]:</p> <ul style="list-style-type: none"> ■ Securities CSD link query ■ Create security CSD link ■ Update security CSD link
Reference	<p>Further information on screens involved can be found in the screen reference part:</p> <ul style="list-style-type: none"> ■ <i>Security CSD links – search/list</i> screen [▶] ■ <i>Security CSD link – new/edit</i> screen [▶]
Instructions	<ol style="list-style-type: none"> 1. Go to the <i>security CSD links – search/list</i> screen: T2S >> Securities >> Security CSD Links >> Search

2. Click on the *new* button.
⇒ The *security CSD link – new* screen is displayed.
3. Enter all mandatory information in the 'CSD Link' frame.
4. To add an issuance account click on the *add row* button in 'Issuance Account' frame.
5. Enter all mandatory information in the available fields of the 'Issuance Account' frame.
6. Click on the *submit changes* button.
⇒ The new issuance account has been added to the list.

Repetition

To add more issuance accounts repeat steps 4 to 6.

You can add up to 10 technical addresses, market-specific attributes or restrictions.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

7. Click on the *submit* button.
➡ The security CSD link has been configured.

3.6.2.3 Configure CSD Account Links

Context of Usage

This business scenario describes how to configure a CSD account link. You need to configure a CSD account link in order to allow cross and external CSD settlement.

A CSD account link is a link that is normally created in order to connect your mirror account opened in your book to your omnibus account opened in the book of your technical issuer. This link allows the construction of a realignment chain starting from the settlement instructions.

If you have opened more than one omnibus account in the book of the issuer CSD, as investor CSD, you have to configure a CSD account link between:

1. the CSD participant account which is opened in your book as one of your mirror accounts and
2. one of your omnibus accounts which is opened in the book of the issuer CSD.

Configuring CSD account links is mandatory for the configuration of a cross-CSD settlement.

This business scenario is not relevant for CSD participant and payment bank users.

Privileges To carry out this business scenario, you need the following privileges [▶]:

- CSD account link query
- Create CSD account link

Reference Further information on screens involved can be found in the screen reference part:

- *CSD account links - search/list* screen [▶]
- *CSD account link - new/edit* screen [▶]

Instructions

1. Go to the *CSD account links – search/list* screen:
T2S >> Securities Account >> CSD Account Links >> Search
2. Click on the *new* button.
⇒ The *CSD account link – new* screen is displayed.
3. Enter all mandatory information in the 'CSD Account Link' frame.

Alternative

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

4. Click on the *submit* button.
➡ The new CSD account link has been configured.

3.6.2.4 Configure Eligible Counterpart CSD

Context of Usage This business scenario describes how to configure an eligible counterpart CSD. Each CSD (internal or external to T2S) must specify all the CSDs that it accepts as counterpart for settlement in T2S for a precise period.

A transaction can be settled only if both counterparts have specified each other as eligible counterpart.

You have to define all necessary eligible counterpart CSDs for yourself and for all your external CSDs.

This business scenario is not relevant for CB and settlement bank users.

Privileges To carry out this business scenario, you need the following privileges [▶]:

- Create eligible counterpart CSD link
- Update eligible counterpart CSD link
- Eligible counterpart CSD list query

Reference Further information on screens involved can be found in the screen reference part:

- *Eligible counterpart CSDs – search/list* screen [▶]
- *Eligible counterpart CSD – new/edit* screen [▶]

Instructions

1. Go to the *eligible counterpart CSDs – search/list* screen:
T2S >> Parties >> Eligible Counterpart CSDs >> Search
2. Click on the *new* button.
⇒ The *eligible counterpart CSD – new* screen is displayed.
3. Enter all mandatory information in the 'Eligible Counterpart CSD' and 'Eligibility Type' frames according to which eligibility type has been selected.
Specify the eligible counterpart CSDs for a specific security, for a country of issuance or for an issuer CSD through the 'Eligibility Type' field.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

4. Click on the *submit* button.
➔ The new eligible counterpart CSD has been configured.

3.6.3 Configuration for External-CSD Settlement

Overview

This business package describes the configuration of all the necessary reference data for an external-CSD settlement by a CSD.

This implies that the settlement occurs between participants belonging to different CSDs, and 1 or several CSDs involved in the settlement chain are external CSDs. Different scenarios are possible depending on which CSDs (the issuer or 1 or more investors) are internal or external. For each scenario the set up of reference data could be different.

As a prerequisite to allow the transaction and the related realignment chain, each internal CSD has to configure in the proper way the party security account, omnibus account, inter security account and mirror account.

Moreover the external CSD has to be created in T2S by the responsible internal CSD.

External-CSD settlement requires the configuration of:

- Security CSD links
- CSD account links
- Eligible counterpart CSD

To configure an external-CSD settlement, carry out the following business scenarios in the predefined order.

Business	■ Configure CSD account links [▶]
Scenario	■ Configure security CSD links [▶]

3.6.3.1 Configure Security CSD Links

Context of Usage This business scenario describes how to configure a security CSD link in order to allow the securities' eligibility for cross-CSD settlement, Intra-CSD settlement and external CSD settlement.

All other investor CSDs that want to settle a security issued by another CSD must define their technical issuer CSD for that security. The technical issuer CSD is the CSD where the investor CSD has opened the omnibus account. It is possible to define as technical issuer both the issuer CSD (direct link configuration) or another investor CSD (relayed link configuration). For a complete direct link configuration it is necessary to define only the issuer CSD first and then to create another security CSD link, between the previously defined issuer CSD (referred to as technical issuer) and the investor CSD. If the link is a direct one, the issuer CSD can decide to specify one or more issuance accounts. If more than one issuance account is specified, the issuer CSD has to indicate the primary account.

Finally, by means of the security maintenance flag it is possible to define a CSD as maintainer for the given financial instrument (security maintaining entity).

Configuring security CSD links is mandatory for the configuration of a cross-CSD settlement, for the configuration of an external-CSD settlement and for the administration of securities.

Before you configure security CSD links, check whether the ISIN and the investor CSD exist. If you are configuring a security CSD link for an ISIN maintained by another CSD, you have to check if you have already added all the mandatory market-specific attributes to the relevant security.

This business scenario is not relevant for CSD participants, CB and payment bank users.

Privileges To carry out this business scenario, you need the following privileges [▶]:

- Securities CSD link query
- Create security CSD link
- Update security CSD link

Reference Further information on screens involved can be found in the screen reference part:

- *Security CSD links – search/list* screen [▶]
- *Security CSD link – new/edit* screen [▶]

Instructions

1. Go to the *security CSD links – search/list* screen:
T2S >> Securities >> CSD Links >> Search
2. Click on the new button.
⇒ The *security CSD link – new* screen is displayed.
3. Enter all mandatory information in the 'Security CSD Link New' frame.
4. To add an issuance account enter all mandatory information in the available fields of the 'Issuance Account' frame.
5. Click on the *submit changes* button.
⇒ The new issuance account has been added to the list.

Repetition

To add more issuance accounts repeat steps 4 and 5.
You can add up to 10 issuance accounts.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.
To cancel the process and return to the previous screen, click on the *cancel* button.

6. Click on the *submit* button.
➔ The security CSD link has been configured.

3.6.3.2 Configure CSD Account Links

Context of Usage This business scenario describes how to configure a CSD account link. You need to configure a CSD account link in order to allow cross and external CSD settlement.

A CSD account link is a link that is normally created in order to connect your mirror account opened in your book to your omnibus account opened in the book of

your technical issuer. This link allows the construction of a realignment chain starting from the settlement instructions.

If you have opened more than one omnibus account in the book of the issuer CSD, as investor CSD, you have to configure a CSD account link between:

1. the CSD participant account which is opened in your book as one of your mirror accounts and
2. one of your omnibus accounts which is opened in the book of the issuer CSD.

Configuring CSD account links is mandatory for the configuration of a cross-CSD settlement.

This business scenario is not relevant for CSD participant and payment bank users.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- CSD account link query
- Create CSD account link

Reference

Further information on screens involved can be found in the screen reference part:

- *CSD account links - search/list* screen [▶]
- *CSD account link - new/edit* screen [▶]

Instructions

1. Go to the *CSD account links – search/list* screen:
T2S >> Securities Account >> CSD Account Links >> Search
2. Click on the *new* button.
⇒ The *CSD account link – new* screen is displayed.
3. Enter all mandatory information in the 'CSD Account Link' frame.

Alternative

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

4. Click on the *submit* button.
➡ The new CSD account link has been configured.

3.7 Account Management

3.7.1 Administration of Securities Accounts

Overview

This business package describes the administration of a securities account by a CSD.

CSDs open and maintain (i.e. edit or delete) securities accounts in their books for their participants and for themselves to hold the securities positions of the participants and to use them for the settlement of instructions in T2S.

Moreover, the responsible CSD has to define for each securities account a link with one or more T2S dedicated cash account(s) in order to make it available for settlement. If this link is not established, the securities account cannot be used for settlement purposes, except for settlement instructions free of payment (FOP).

Finally, in order to allow cross and external CSD settlement on a securities account, the CSD has to set up a CSD account link between its mirror account, the technical issuer CSD mirror account and its inter-CSD account.

To administer a securities account, carry out the following business scenarios in the predefined order:

Business Scenarios

- Create a new securities account [▶]
- Edit an existing securities account [▶]
- Delete an existing securities account [▶]

3.7.1.1 Create a New Securities Account

Context of Usage

This business scenario describes how to create a new securities account. Each CSD is responsible for opening securities accounts in its books for itself and all its participants. T2S envisages the following types of securities accounts:

- CSD participant account, i.e. the ordinary securities account used for the settlement of instructions
- CSD mirror account, CSD omnibus account and inter-CSD account, all used for cross-CSD settlement
- Issuance account, i.e. the securities account reflecting the holdings of the participants of the issuer CSD for a given financial instrument. The issuer CSD can specify the issuance account for any given security when setting up its securities CSD links configuration for the same security
- T2S technical offset account, i.e. a specific technical account foreseen for settlement in the direct holding markets only

T2S provides the possibility to define a time-dependent relationship between CSD participants and securities accounts. This means that the CSD can change the relationship between the CSD participant and the securities accounts. Only one CSD must be linked to the securities account at any point in time. There is no limit on the number of securities accounts a single party can own within the same CSD.

Before you start, check whether the securities account has not already been created by someone else. Finally you have to check if a mandatory market-specific attribute is mandatory.

This business scenario is not relevant for CB and payment bank users.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- Securities account list query
- Create securities account
- Update securities account

Reference

Further information on screens involved can be found in the screen reference part:

- *Securities accounts – search/list* screen [▶]
- *Securities account – new/edit* screen [▶]

Instructions

1. Go to the *securities accounts – search/list* screen:
T2S >> Securities Accounts >> Securities Account >> Search
2. Click on the *new* button.
⇒ The *securities account – new* screen is displayed.
3. Enter all mandatory information in the 'Securities Account New' frame.
4. To add a market-specific attribute or a restriction, enter all mandatory information in the 'Market-Specific Attributes' and 'Restrictions' frames.
5. Click on the *add row* button.

Repetition

To add more market-specific attributes or restrictions, click on the *submit changes button* and repeat steps 4 and 5.

You can add up to 10 market-specific attributes or restrictions.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

6. Click on the *submit* button.

➡ The new securities account has been created.

3.7.1.2 Edit an Existing Securities Account

Context of Usage

This business scenario describes how to edit an existing securities account. Each CSD is responsible for maintaining the reference data for the securities account of their participants and for other CSDs that are external to T2S.

T2S provides the CSD the possibility to define a time-dependent relationship between CSD participants and securities accounts. This means that the CSD can change the relationship between the CSD participant and the security accounts.

This business scenario is not relevant for directly connected participants, CB and payment bank users.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- Securities account list query
- Securities account reference data query
- Create securities account
- Update securities account
- Delete securities account

Reference

Further information on screens involved can be found in the screen reference part:

- *Securities accounts – search/list* screen [▶]
- *Securities account – new/edit* screen [▶]
- *Securities account – details* screen [▶]

Instructions

1. Go to the *securities accounts – search/list* screen:
T2S >> Securities Account >> Securities Accounts >> Search
2. Enter all search criteria known to you about the securities account you want to edit.
3. Click on the *search* button.
⇒ A list containing the search results is displayed on the same screen.

- ⇒ If the search retrieves only one securities account, the *securities account – details* screen is displayed directly. Proceed with step 6.
4. Select the relevant securities account by clicking on an entry in the list.
5. Click on the *edit* button.
 - ⇒ The *securities account - edit* screen is displayed.
6. To change current values of the securities account enter all mandatory information in the 'Securities Account' frame.
 - ⇒ To change the account holder click on the *securities account transfer management* button
 - ⇒ The *Securities account transfer management* prompt is displayed.
7. Enter all mandatory information and click on the *save* button
 - ⇒ Enter all the relevant information in the 'Account Holder' frame.
8. Click on the *submit* button
 - ⇒ the *securities account – edit* screen is displayed
9. To add market-specific attributes or restrictions, click on the *add row* button under the 'Option' column under the relevant frame.
10. Enter all mandatory information in the 'Market-Specific Attributes' or 'Restrictions' frames.
11. Click on the *submit changes* button.
 - ⇒ A new market-specific attribute or restriction has been added to the list.
12. To change market-specific attributes or restrictions, select the relevant market-specific attribute or restriction clicking on an entry in the list.
13. Click on the *copy row* button
14. Update the data by clicking on the *submit changes* button.
 - ⇒ The data of the market-specific attribute or restriction have been changed in the list.
15. To delete a market-specific attribute or restriction, select the relevant entry from the list.
16. Click on the *delete row* button in the 'Options' column.
 - ⇒ The market-specific attribute or restriction has been deleted from the list.

Repetition

Repeat steps 10, 11 and 12 to add more market-specific attributes or restrictions.

Repeat steps 13 to 16 to edit more market-specific attributes or restrictions.

Repeat steps 17 and 18 to delete more market-specific attributes or restrictions.

You can add, edit or delete up to 10 market-specific attributes or restrictions.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

17. Click on the *submit* button.

➡ The edited securities account reference data are stored.

3.7.1.3 Delete an Existing Securities Account

Context of Usage

This business scenario describes how to delete an existing securities account. CSDs are responsible for the administration of their respective parties, including the deletion of securities accounts.

Deleting an existing securities account is an optional step for the administration of securities accounts.

Before you delete a security, check the opening and closing date of the party. The request to delete a securities account must refer to an existing and active securities account in T2S. A securities account can be only deleted if the closing date has passed or if the opening date has not yet been reached (future opening date). If the closing date is equal to the current date, you have to wait for the new business day to delete the securities account. In addition, make sure that all the linked instances in a higher position within the deletion hierarchy (i.e. CSD account link, CMB securities account link) have been deleted.

This business scenario is not relevant for CB and payment bank users.

Privileges

To carry out this business scenario, you need the following privileges [►]:

- Delete securities account
- Securities account reference data query
- Securities account list query

- | | |
|---------------------|--|
| Reference | Further information on screens involved can be found in the screen reference part: |
| | <ul style="list-style-type: none"> ■ <i>Securities accounts – search/list</i> screen [▶] ■ <i>Securities account – details</i> screen [▶] |
| Instructions | <ol style="list-style-type: none"> 1. Go to the securities accounts – search/list screen:
T2S >> Securities Accounts >> Securities Accounts >> Search 2. Enter all search criteria known to you about the securities account you want to delete. 3. Click on the search button. <ul style="list-style-type: none"> ⇒ A list containing the search results is displayed on the same screen. ⇒ If the search retrieves only one securities account, the <i>securities account – details</i> screen is displayed directly. Proceed with step 6. 4. Select the relevant securities account by clicking on an entry in the list. 5. Click on the <i>details</i> button. <ul style="list-style-type: none"> ⇒ The <i>securities account – details</i> screen is displayed. 6. Click on the <i>delete</i> button if the opening date has not been reached and/or the closing date is greater than the current date. <ul style="list-style-type: none"> ⇒ A confirmation prompt is displayed. |

7. Click on the yes button if you really want to delete the securities account.
 - ➔ The securities account has been deleted.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

3.7.2 Administration of Cash Accounts

Overview This business package describes the administration of a cash account.

Each national central bank is responsible for creating the cash accounts for its participants and itself.

To administer a cash account, carry out the business scenario relevant to you from the list below:

- | | |
|---------------------------|---|
| Business Scenarios | <ul style="list-style-type: none"> Create a new external RTGS account [▶] Create a new T2S dedicated cash account [▶] Edit an existing T2S dedicated cash account [▶] Delete an existing T2S dedicated cash account [▶] |
|---------------------------|---|

3.7.2.1 Create a New External RTGS Account

- | | |
|-------------------------|---|
| Context of Usage | <p>This business scenario describes how to create a new external RTGS account in T2S.</p> <p>External RTGS accounts are cash accounts that belong to the RTGS systems connected to T2S. They must be defined in the system to allow liquidity transfers from a T2S dedicated cash account to an external RTGS account and vice versa (i.e. automatic reimbursement at the end of day). The central bank is responsible for maintaining the consistency between the external RTGS account reference data and the corresponding information in the respective RTGS system.</p> <p>When creating a new T2S dedicated cash account, it is mandatory to specify an external RTGS account to which it is linked.</p> <p>This business scenario is not relevant for CSD, CSD participant and payment bank users.</p> |
| Privileges | <p>To carry out this business scenario, you need the following privileges [▶]:</p> <ul style="list-style-type: none"> Create external RTGS account External RTGS account list query |
| Reference | <p>Further information on screens involved can be found in the screen reference part:</p> <ul style="list-style-type: none"> <i>External RTGS accounts – search/list</i> screen [▶] <i>External RTGS account – new/edit</i> screen [▶] |
| Instructions | <ol style="list-style-type: none"> 1. Go to the <i>external RTGS accounts – search/list</i> screen:
Common >> Cash >> External RTGS Accounts >> Search 2. Click on the <i>new</i> button.
⇒ The <i>external RTGS account – new</i> screen is displayed. 3. Enter all mandatory information in the 'External RTGS Account' frame. 4. To add a restriction, click on the <i>add row</i> button in the 'External RTGS Account Restrictions' frame. |

5. Enter all the mandatory information in the frame.
6. Click on the submit changes button.
⇒ A new restriction has been added to the list.

Repetition

To add more external RTGS account restrictions, repeat steps 4, 5 and 6.
You can add up to 10 external RTGS account restrictions.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

7. Click on the *submit* button.
➡ The new external RTGS account has been created.

3.7.3 Configuration for a Central Bank

Overview

This business package describes the configuration for a central bank needed to provide credit through the auto-collateralisation process.

To finalise its account configuration, a central bank must create its own T2S dedicated cash account, open a regular securities account for central bank collateralisation and a new securities account for settlement purposes.

To configure for a central bank, carry out the following business scenarios in the predefined order.

Business Scenarios

- Create a new T2S dedicated cash account [▶]
- Create a new credit memorandum balance [▶]
- Set up an auto-collateralisation limit [▶]
- Create a new participant [▶]
- Create a new securities account [▶]
- Link a securities account to a T2S dedicated cash account for cash settlement purpose [▶]

3.7.3.1 Create a New T2S Dedicated Cash Account

Context of Usage	<p>This business scenario describes how to create a new T2S dedicated cash account.</p> <p>Each central bank is responsible for opening T2S dedicated cash accounts for itself and its payment banks, in order to settle the cash leg of any settlement instruction.</p> <p>You have to link each of your T2S dedicated cash accounts to a specific T2S settlement currency and to an external RTGS account that must be denominated in the same currency.</p> <p>In addition, you have to create a new credit memorandum balance whenever you set up a new cash account.</p> <p>This business scenario is mandatory for the administration of cash accounts, for the configuration for a central bank and for the configuration for central bank collateralisation.</p> <p>This business scenario is not relevant for CSD, CSD participant or external CSD users.</p>
Privileges	<p>To carry out this business scenario, you need the following privileges [►]:</p> <ul style="list-style-type: none"> ■ Create Cash Account ■ Cash Account list query
Reference	<p>Further information on screens involved can be found in the screen reference part:</p> <ul style="list-style-type: none"> ■ <i>Cash Accounts – search/list</i> screen [Book 1] ■ <i>Cash Account – new/edit</i> screen [Book 1]
Instructions	<ol style="list-style-type: none"> 1. Go to the <i>Cash Accounts – search/list</i> screen: Common >> Cash >> Cash Accounts >> Search 2. Click on the new button. ⇒ The <i>Cash Account – new</i> screen is displayed. 3. Enter all mandatory information in the 'Cash Account' frame. 4. Fill in the 'Linked Account Number' field to link the External RTGS Account and select the currency from the 'Currency' field. 5. To add a restriction, click on <i>add row</i> button under the 'Restrictions' frame.

6. Enter all mandatory information in the available fields of the 'Restrictions' frame.
7. Click on *submit changes* button.
 ➔ A new restriction has been added to the list.

Repetition

To add more restrictions, repeat steps 7, 8 and 9.
You can add up to 10 restrictions.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

8. Click on the submit button.
 ➔ The new T2S dedicated cash account has been created.

3.7.3.2 Create a New Credit Memorandum Balance

Context of Usage

This business scenario describes how to create a new credit memorandum balance. A credit memorandum balance is a tool that T2S uses to track the provision of credit from CBs to payment banks (for central bank collateralisation) and from payment banks to their clients. You have to set up a credit memorandum balance whenever you create a new cash account.

Creating a new credit memorandum balance is mandatory for the configuration of a central bank, for the configuration for central bank collateralisation, and for the configuration for client collateralisation. In particular primary CMBs are used for

central bank collateralisation only. It is always necessary to configure a primary CMB on the central bank account and on the DCA belonging to the payment bank. Finally there are three possible central bank configurations according to the collateralisation procedure adopted by the relevant central bank: repo, pledge and pledge-sub. Non-primary CMBs are used for client collateralization. In this case only the REPO model is available.

Before you create a new credit memorandum balance, check whether a new central bank T2S dedicated cash account, a new payment bank and a new payment bank T2S dedicated cash account have been previously created.

After the creation of the new CMB it is necessary to configure CMB security account links and limits in order to allow central bank and client collateralisation.

This business scenario is not relevant for CSD and CSD participant users.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- CMB list query
- Create credit memorandum balance

Reference

Further information on screens involved can be found in the screen reference part:

- *Credit memorandum balances – search/list* screen [▶]
- *Credit memorandum balance – new/edit* screen [▶]

Instructions

1. Go to the *credit memorandum balances – search/list* screen:
T2S >> Cash >> CMB >> Search
2. Click on the *new* button.
⇒ The *credit memorandum balance – new* screen is displayed.
3. Enter all mandatory information about the credit memorandum balance you want to create.

4. In case of central bank collateralisation, you as central bank have to create a new primary CMB.
5. Enter the number of the T2S dedicated cash account to be used as your CB cash account.
6. Flag the 'Primary CMB' checkbox.

Alternative 1

In case of central bank collateralisation, you as central bank have to create a new primary CMB for your payment banks:

1. Enter the number of the T2S dedicated cash account to be used as payment bank's cash account.
2. Flag the 'Primary CMB' checkbox.
3. Enter the cash account number where a primary CMB has been configured in the 'CB T2S Dedicated Cash Account' frame.
4. Enter your regular securities account held as CSD participant and linked to its primary CMB via a CMB account link in the 'Regular Securities Account' frame.
5. In case of a repo enter the number of your securities account held as CSD participant and linked to its primary CMB via a CMB account link in the 'Receiving Securities Account' frame. In case of a pledge you should add a securities account held by the payment bank as CSD participant updating the primary CMB you have previously created. In case of a pledge-sub procedure no receiving securities account is present.

Alternative 2

In case of client collateralisation, only available in repo procedure, you as payment bank have to:

1. Enter the number of the T2S dedicated cash account to be used as your CB cash account.
2. Do not flag the 'Primary CMB' checkbox.
3. Enter one of your security accounts linked to your primary CMB via CMB securities account link in the 'Receiving Security Account' frame.
4. Click on the *add row* button under the 'Authorized BIC Rules' frame.
5. Enter at least one wildcard pattern in the 'Authorized BIC Rules' frame.

Alternative 3

In case of client collateralisation and you act as a payment bank:

1. Enter a wildcard patterns to capture your clients BICs.
2. Click on the *submit changes* button.

Repetition

To assign more than one wildcard pattern, repeat alternative 3.

You can only add up to 10 wildcard patterns at once.

General Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

7. Click on the *submit* button.

⇒ In case you created a new primary central bank CMB a prompt will ask if you want to continue with the configuration by creating the auto-collateralisation limit.

8. Click on the *no* button.

➔ A new credit memorandum balance has been created.

3.7.3.3 Set up an Auto-Collateralisation Limit

Context of Usage

This business scenario describes how to set up an auto-collateralisation limit in order to cap the intraday credit provided on a specific T2S dedicated cash account either for central bank collateralisation, client collateralisation, set up of an external guarantee or unsecured credit limit. In the first case you cap the credit you provide to one of your payment bank on a specific T2S dedicated cash account (relevant for CB users), whereas in the second case you cap the credit you provide to one of your clients on a specific T2S dedicated cash account (relevant for payment bank users).

Setting up an auto-collateralisation limit is mandatory for the configuration for a central bank and for the configuration for client collateralisation.

Privileges

To carry out this business scenario, you need the following privileges [►]:

- Limit query
- Create limit

Reference

Further information on screens involved can be found in the screen reference part:

- *Limits - search/list* screen [Book 1]
- *Limit - new/edit* screen [Book 1]

Instructions

1. Go to the *limits – search/list* screen:
Common >> Cash >> Limits >> Search
2. Click on the new button.
⇒ The *limit – new* screen is displayed.
3. Enter all mandatory information about the limit you want to create in the 'Limit' frame.
4. Select 'Auto-collateralisation' in the 'Limit Type' field.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

5. Click on the *submit* button.
➔ The new auto-collateralisation limit has been created.

3.7.3.4 Create a New Participant

Context of Usage

This business scenario describes how to create a new participant. Each CSD is responsible for the creation of the party reference data for their CSD participants and for other CSDs that are external to T2S, whereas each CB is responsible for the creation of the party reference data for their payment banks.

Creating a new participant is mandatory for the administration of participants. It is optional for the configuration for intra-CSD settlement, for the configuration for a central bank, for the configuration for central bank collateralisation and for the configuration for client collateralisation.

Before you start, check whether the participant has not already been created by someone else. Also, make sure that the party BIC you want to use for the new participant has been created in the BIC directory. Finally you have to check if a mandatory market-specific attribute is required.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- Party list query
- Create Party

Reference

Further information on screens involved can be found in the screen reference part:

- *Parties – search/list* screen [Book 1]
- *Party – new/edit* screen [Book 1]

Instructions

1. Go to the *parties – search/list* screen:
Common >> Parties >> Parties >> Search
2. Click on the *new* button.
⇒ The *party – new* screen is displayed.
3. Enter all mandatory information in the 'Party', 'Address' and 'Auto-Collateralisation Rules' frames.
If the party type is 'CSD participant', the 'Address' frame is not available.
The 'Auto-Collateralisation Rule' frame is only available for the 'Payment Bank' party type.
4. To add a technical address, market-specific attribute or restriction, enter all mandatory information in the 'Technical Addresses', 'Market-Specific Attributes' and 'Restrictions' frames.
The 'Market-Specific Attributes' frame is only mandatory, if the market-specific attribute is defined as mandatory.
At least one technical address has to be defined.
5. Click on the *add row* button.
⇒ A new technical address, market-specific attribute or restriction has been added to the list.

Repetition

To add more technical addresses, market-specific attributes or restrictions, repeat steps 4 and 5.

You can add up to 10 technical addresses, market-specific attributes or restrictions.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

6. Click on the *submit* button
➔ The new participant has been created.

3.7.3.5 Create a New Securities Account

Context of Usage	<p>This business scenario describes how to create a new securities account. Each CSD is responsible for opening securities accounts for itself and all its participants. T2S envisages the following types of securities accounts:</p> <ul style="list-style-type: none"> ■ CSD participant account, i.e. the ordinary securities account used for the settlement of instructions ■ CSD mirror account, CSD omnibus account and inter-CSD account, all used for cross-CSD settlement ■ Issuance account, i.e. the securities account reflecting the holdings of the participants of the issuer CSD for a given financial instrument. The issuer CSD can specify the issuance account for any given security when setting up its securities CSD links configuration for the same security ■ T2S technical offset account, i.e. a specific technical account foreseen for settlement in the direct holding markets only <p>T2S provides the possibility to define a time-dependent relationship between CSD participants and securities accounts. This means that the CSD can change the relationship between the CSD participant and the securities accounts. Only one CSD must be linked to the securities account at any point in time. There is no limit on the number of securities accounts a single party can own within the same CSD.</p> <p>Before you start, check whether the securities account has not already been created by someone else. Finally you have to check if a mandatory market-specific attribute is mandatory.</p> <p>This business scenario is not relevant for CB and payment bank users.</p>
Privileges	<p>To carry out this business scenario, you need the following privileges [▶]:</p> <ul style="list-style-type: none"> ■ Securities account list query ■ Create Securities Account ■ Update Securities Account
Reference	<p>Further information on screens involved can be found in the screen reference part:</p> <ul style="list-style-type: none"> ■ <i>Securities accounts – search/list</i> screen [▶] ■ <i>Securities account – new/edit</i> screen [▶]
Instructions	<ol style="list-style-type: none"> 1. Go to the <i>securities accounts – search/list</i> screen: T2S >> Securities Accounts >> Securities Accounts >> Search 2. Click on the <i>new</i> button. ⇒ The <i>securities account – new</i> screen is displayed.

3. Enter all mandatory information.
4. To add a market-specific attribute or a restriction, enter all mandatory information in the 'Market-Specific Attributes' and 'Restrictions' frames.
5. Click on the *add row* button.

Repetition

To add more market-specific attributes or restrictions, click on the *submit changes button* and repeat steps 4 and 5.

You can add up to 10 market-specific attributes or restrictions.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

6. Click on the submit button.
 - ➔ The new securities account has been created.

3.7.3.6 Link a Securities Account to a T2S Dedicated Cash Account for Cash Settlement Purpose

Context of Usage	<p>This business scenario describes how to link a securities account to a T2S dedicated cash account for cash settlement purpose for the settlement of the cash leg of the settlement instructions related to a given securities account belonging to one of your participants.</p> <p>Before you start, verify that a credit memorandum balance has been previously created.</p> <p>This business scenario is not relevant for CB, payment bank and CSD participant users.</p>
Privileges	<p>To carry out this business scenario, you need the following privileges [▶]:</p> <ul style="list-style-type: none"> ■ Create CMB securities account link ■ CMB securities account link list query
Reference	<p>Further information on screens involved can be found in the screen reference part:</p> <ul style="list-style-type: none"> ■ <i>Securities accounts links – search/list</i> screen [▶] ■ <i>Securities accounts link – new/edit</i> screen [▶]

Instructions

1. Go to the *Securities account links – search/list* screen:
T2S >> Security Accounts >> Security Accounts Links >> Search
2. Click on the new button.
⇒ The *Securities account links – new* screen is displayed.
3. Enter all mandatory information and set the cash settlement link flag to 'Yes'.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

4. Click on the *submit* button.
➡ A new securities account link has been created.

3.7.4 Configuration for Central Bank Collateralisation

Overview

This business package describes the configuration for central bank collateralisation in reference data.

A central bank can provide credit from its T2S dedicated cash account to the T2S dedicated cash account of its participants, with an auto-collateralisation process.

In order to finalise the configuration for central bank collateralisation in case of a pledge, you have to open a new regular securities account and link it to a T2S dedicated cash account for collateralisation purposes and for receiving collateral.

To configure for a central bank collateralisation, carry out the following business scenarios in the predefined order.

Business Scenarios

- Create a new participant [▶] (creation of a new CSD participant for the central bank)
- Create a new T2S dedicated cash account [▶]
- Create a new credit memorandum balance [▶] (create the primary CMB)

- Set up an auto-collateralisation limit [▶]
- Create a new securities account [▶]
- Link a securities account to a T2S dedicated cash account for cash settlement purpose [▶]

3.7.4.1 Create a New Participant

Context of Usage

This business scenario describes how to create a new participant. Each CSD is responsible for the creation of the party reference data for their CSD participants and for other CSDs that are external to T2S, whereas each CB is responsible for the creation of the party reference data for their payment banks.

Creating a new participant is mandatory for the administration of participants. It is optional for the configuration for intra-CSD settlement, for the configuration for a central bank, for the configuration for central bank collateralisation and for the configuration for client collateralisation.

Before you start, check whether the participant has not already been created by someone else. Also, make sure that the party BIC you want to use for the new participant has been created in the BIC directory. Finally you have to check if a mandatory market-specific attribute is required.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- Party list query
- Create Party

Reference

Further information on screens involved can be found in the screen reference part:

- *Parties – search/list* screen [Book 1]
- *Party – new/edit* screen [Book 1]

Instructions

1. Go to the *parties – search/list* screen:
Common >> Parties >> Parties >> Search
2. Click on the *new* button.
⇒ The *party – new* screen is displayed.
3. Enter all mandatory information in the 'Party', 'Address' and 'Auto-Collateralisation Rules' frames.
If the party type is 'CSD participant', the 'Address' frame is not available.
The 'Auto-Collateralisation Rule' frame is only available for the 'Payment Bank' party type.
4. To add a technical address, market-specific attribute or restriction, enter all mandatory information in the 'Technical Addresses', 'Market-Specific Attributes' and 'Restrictions' frames.

The 'Market-Specific Attributes' frame is only mandatory, if the market-specific attribute is defined as mandatory.

At least one technical address has to be defined.

5. Click on the *add row* button.

⇒ A new technical address, market-specific attribute or restriction has been added to the list.

Repetition

To add more technical addresses, market-specific attributes or restrictions, repeat steps 4 and 5.

You can add up to 10 technical addresses, market-specific attributes or restrictions.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

6. Click on the *submit* button

➔ The new participant has been created.

3.7.4.2 Create a New T2S Dedicated Cash Account

Context of Usage

This business scenario describes how to create a new T2S dedicated cash account.

Each central bank is responsible for opening T2S dedicated cash accounts for itself and its payment banks, in order to settle the cash leg of any settlement instruction.

You have to link each of your T2S dedicated cash accounts to a specific T2S settlement currency and to an external RTGS account that must be denominated in the same currency.

In addition, you have to create a new credit memorandum balance whenever you set up a new cash account.

This business scenario is mandatory for the administration of cash accounts, for the configuration for a central bank and for the configuration for central bank collateralisation.

This business scenario is not relevant for CSD, CSD participant or external CSD users.

Privileges

To carry out this business scenario, you need the following privileges:

- Create Cash Account
- Cash Account list query

Reference

Further information on screens involved can be found in the screen reference part:

- *Cash Accounts – search/list* screen [Book 1]
- *Cash Account – new/edit* screen [Book 1]

Instructions

1. Go to the *Cash Accounts – search/list* screen:
Common >> Cash >> Cash Accounts >> Search
2. Click on the *new* button.
⇒ The Cash Account– *new* screen is displayed.
3. Enter all mandatory information in the 'Cash Account' frame.
4. Fill in the 'Linked Account Number' field to link the External RTGS Account and select the currency from the 'Currency' field.
5. To add a restriction, click on *add row* button under the 'Restrictions' frame.

6. Enter all mandatory information in the available fields of the 'Restrictions' frame.
7. Click on *submit changes* button.
⇒ A new restriction has been added to the list.

Repetition

To add more restrictions, repeat steps 7, 8 and 9.

You can add up to 10 restrictions.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

8. Click on the *submit* button.

➔ The new T2S dedicated cash account has been created.

3.7.4.3 Create a New Credit Memorandum Balance

Context of Usage

This business scenario describes how to create a new credit memorandum balance. A credit memorandum balance is a tool that T2S uses to track the provision of credit from CBs to payment banks (for central bank collateralisation) and from payment banks to their clients. You have to set up a credit memorandum balance whenever you create a new cash account.

Creating a new credit memorandum balance is mandatory for the configuration of a central bank, for the configuration for central bank collateralisation, and for the configuration for client collateralisation. In particular primary CMBs are used for central bank collateralisation only. It is always necessary to configure a primary CMB on the central bank account and on the DCA belonging to the payment bank. Finally there are three possible central bank configurations according to the collateralisation procedure adopted by the relevant central bank: repo, pledge and pledge-sub. Non-primary CMBs are used for client collateralization. In this case only the REPO model is available.

Before you create a new credit memorandum balance, check whether a new central bank T2S dedicated cash account, a new payment bank and a new payment bank T2S dedicated cash account have been previously created.

After the creation of the new CMB it is necessary to configure CMB security account links and limits in order to allow central bank and client collateralisation.

This business scenario is not relevant for CSD and CSD participant users.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- CMB list query
- Create credit memorandum balance

Reference

Further information on screens involved can be found in the screen reference part:

- *Credit memorandum balances – search/list* screen [▶]
- *Credit memorandum balance – new/edit* screen [▶]

Instructions

1. Go to the *credit memorandum balances – search/list* screen:
T2S >> Cash >> CMB >> Search
2. Click on the *new* button.
⇒ The *credit memorandum balance – new* screen is displayed.
3. Enter all mandatory information about the credit memorandum balance you want to create.

4. In case of central bank collateralisation, you as central bank have to create a new primary CMB.
5. Enter the number of the T2S dedicated cash account to be used as your CB cash account.
6. Flag the 'Primary CMB' checkbox.

Alternative 1

In case of central bank collateralisation, you as central bank have to create a new primary CMB for your payment banks:

1. Enter the number of the T2S dedicated cash account to be used as payment bank's cash account.
2. Flag the 'Primary CMB' checkbox.
3. Enter the cash account number where a primary CMB has been configured in the 'CB T2S Dedicated Cash Account' frame.
4. Enter your regular securities account held as CSD participant and linked to its primary CMB via a CMB account link in the 'Regular Securities Account' frame.
5. In case of a repo enter the number of your securities account held as CSD participant and linked to its primary CMB via a CMB account link in the 'Receiving Securities Account' frame. In case of a pledge you should add a securities account held by the payment bank as CSD participant updating the primary CMB you have previously created. In case of a pledge-sub procedure no receiving securities account is present.

Alternative 2

In case of client collateralisation, only available in repo procedure, you as payment bank have to:

1. Enter the number of the T2S dedicated cash account to be used as your CB cash account.
2. Do not flag the 'Primary CMB' checkbox.
3. Enter one of your security accounts linked to your primary CMB via CMB securities account link in the 'Receiving Security Account' frame.
4. Click on the *add row* button under the 'Authorized BIC Rules' frame.
5. Enter at least one wildcard pattern in the 'Authorized BIC Rules' frame.

Alternative 3

In case of client collateralisation and you act as a payment bank:

1. Enter a wildcard patterns to capture your clients BICs.
2. Click on the *submit changes* button.

Repetition

To assign more than one wildcard pattern, repeat alternative 3.

You can only add up to 10 wildcard patterns at once.

General Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

7. Click on the *submit* button.

⇒ In case you created a new primary central bank CMB a prompt will ask if you want to continue with the configuration by creating the auto-collateralisation limit.

8. Click on the no button.

➔ A new credit memorandum balance has been created.

3.7.4.4 Set up an Auto-Collateralisation Limit

Context of Usage

This business scenario describes how to set up an auto-collateralisation limit in order to cap the intraday credit provided on a specific T2S dedicated cash account either for central bank collateralisation, client collateralisation, set up of an external guarantee or unsecured credit limit. In the first case you cap the credit you provide to one of your payment bank on a specific T2S dedicated cash account (relevant for CB users), whereas in the second case you cap the credit you provide to one of your clients on a specific T2S dedicated cash account (relevant for payment bank users).

Setting up an auto-collateralisation limit is mandatory for the configuration for a central bank and for the configuration for client collateralisation.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- Limit query
- Create limit

Reference

Further information on screens involved can be found in the screen reference part:

- *Limits - search/list* screen [Book 1]
- *Limit - new/edit* screen [Book 1]

Instructions

1. Go to the *limits – search/list* screen:
Common >> Cash >> Limits >> Search
2. Click on the *new* button.
⇒ The *limit – new* screen is displayed.
3. Enter all mandatory information about the limit you want to create.
4. Select 'T2S Auto-collateralisation Limit' in the 'Limit Type' field.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

5. Click on the *submit* button.
➔ The new auto-collateralisation limit has been created.

3.7.4.5 Create a New Securities Account

Context of Usage

This business scenario describes how to create a new securities account. Each CSD is responsible for opening securities accounts in its books for itself and all its participants. T2S envisages the following types of securities accounts:

- CSD participant account, i.e. the ordinary securities account used for the settlement of instructions
- CSD mirror account, CSD omnibus account and inter-CSD account, all used for cross-CSD settlement
- Issuance account, i.e. the securities account reflecting the holdings of the participants of the issuer CSD for a given financial instrument. The issuer CSD can specify the issuance account for any given security when setting up its securities CSD links configuration for the same security
- T2S technical offset account, i.e. a specific technical account foreseen for settlement in the direct holding markets only

T2S provides the possibility to define a time-dependent relationship between CSD participants and securities accounts. This means that the CSD can change the relationship between the CSD participant and the securities accounts. Only one CSD must be linked to the securities account at any point in time. There is no limit on the number of securities accounts a single party can own within the same CSD.

Before you start, check whether the securities account has not already been created by someone else. Finally you have to check if a mandatory market-specific attribute is mandatory.

This business scenario is not relevant for CB and payment bank users.

Privileges To carry out this business scenario, you need the following privileges [▶]:

- Securities account list query
- Create securities account
- Update securities account

Reference Further information on screens involved can be found in the screen reference part:

- *Securities accounts – search/list* screen [▶]
- *Securities account – new/edit* screen [▶]

Instructions

1. Go to the *securities accounts – search/list* screen:
T2S >> Securities Accounts >> Securities Account >> Search
2. Click on the new button.
⇒ The *securities account – new* screen is displayed.
3. Enter all mandatory information in the 'Securities Account' frame.
4. To add a market-specific attribute or a restriction, enter all mandatory information in the 'Market-Specific Attributes' and 'Restrictions' frames.
5. Click on the *add row* button.

Repetition

To add more market-specific attributes or restrictions, click on the *submit changes button* and repeat steps 4 and 5.

You can add up to 10 market-specific attributes or restrictions.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

7. Click on the *submit* button.
➡ The new securities account has been created.

3.7.4.6 Link a Securities Account to a T2S Dedicated Cash Account for Cash Settlement Purpose

Context of Usage This business scenario describes how to link a securities account to a T2S dedicated cash account for cash settlement purpose for the settlement of the cash leg of the settlement instructions related to a given securities account belonging to one of your participants.

Before you start, verify that a credit memorandum balance has been previously created.

This business scenario is not relevant for CB, payment bank and CSD participant users.

Privileges To carry out this business scenario, you need the following privileges [►]:

- Create CMB securities account link
- CMB securities account link query

Reference Further information on screens involved can be found in the screen reference part:

- *Securities accounts links – search/list* screen [►]
- *Securities accounts link – new/edit* screen [►]

Instructions

1. Go to the *Securities account links – search/list* screen:
T2S >> Securities Account >> Account Links >> Search
2. Click on the *new* button.
⇒ The *Securities account links – new* screen is displayed.
3. Enter all mandatory information in the 'Account Link' frame and set the cash settlement link flag to 'Yes'.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

4. Click on the *submit* button.

➡ A new CMB securities account link has been created.

3.7.5 Configuration for Client Collateralisation

Overview

This business package describes the configuration for client collateralisation in CRDM.

A payment bank can authorise one or more of its participants to use its T2S dedicated cash account for settlement purposes to provide credit to its client(s) via an auto-collateralisation process.

To configure for client collateralisation, carry out the following business scenarios in the predefined order.

Business Scenarios

1. Create a new credit memorandum balance [▶]
2. Set up an auto-collateralisation limit [▶]
3. Create a new participant [▶]
4. Create a new securities account [▶]
5. Link a security account to a T2S dedicated cash account for cash settlement purpose [▶]

3.7.5.1 Create a New Credit Memorandum Balance

Context of Usage

This business scenario describes how to create a new credit memorandum balance. A credit memorandum balance is a tool that T2S uses to track the provision of credit from CBs to payment banks (for central bank collateralisation) and from payment banks to their clients. You have to set up a credit memorandum balance whenever you create a new cash account.

Creating a new credit memorandum balance is mandatory for the configuration of a central bank, for the configuration for central bank collateralisation, and for the configuration for client collateralisation. In particular primary CMBs are used for central bank collateralisation only. It is always necessary to configure a primary CMB on the central bank account and on the DCA belonging to the payment bank. Finally there are three possible central bank configurations according to the collateralisation procedure adopted by the relevant central bank: repo, pledge

and pledge-sub. Non-primary CMBs are used for client collateralization. In this case only the REPO model is available.

Before you create a new credit memorandum balance, check whether a new central bank T2S dedicated cash account, a new payment bank and a new payment bank T2S dedicated cash account have been previously created.

After the creation of the new CMB it is necessary to configure CMB security account links and limits in order to allow central bank and client collateralisation.

This business scenario is not relevant for CSD and CSD participant users.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- CMB list query
- Create credit memorandum balance

Reference

Further information on screens involved can be found in the screen reference part:

- *Credit memorandum balances – search/list* screen [▶]
- *Credit memorandum balance – new/edit* screen [▶]

Instructions

1. Go to the *credit memorandum balances – search/list* screen:
T2S >> Cash >> CMB >> Search
2. Click on the *new* button.
⇒ The *credit memorandum balance – new* screen is displayed.
3. Enter all mandatory information about the credit memorandum balance you want to create.

- In case of central bank collateralisation, you as central bank have to create a new primary CMB.
- Enter the number of the T2S dedicated cash account to be used as your CB cash account.
- Flag the 'Primary CMB' checkbox.

Alternative 1

In case of central bank collateralisation, you as central bank have to create a new primary CMB for your payment banks:

1. Enter the number of the T2S dedicated cash account to be used as payment bank's cash account.
2. Flag the 'Primary CMB' checkbox.
3. Enter the cash account number where a primary CMB has been configured in the 'CB T2S Dedicated Cash Account' frame.
4. Enter your regular securities account held as CSD participant and linked to its primary CMB via a CMB account link in the 'Regular Securities Account' frame.
5. In case of a repo enter the number of your securities account held as CSD participant and linked to its primary CMB via a CMB account link in the 'Receiving Securities Account' frame. In case of a pledge you should add a securities account held by the payment bank as CSD participant updating the primary CMB you have previously created. In case of a pledge-sub procedure no receiving securities account is present.

Alternative 2

In case of client collateralisation, only available in repo procedure, you as payment bank have to:

1. Enter the number of the T2S dedicated cash account to be used as your CB cash account.
2. Do not flag the 'Primary CMB' checkbox.
3. Enter one of your security accounts linked to your primary CMB via CMB securities account link in the 'Receiving Security Account' frame.
4. Click on the *add row* button under the 'Authorized BIC Rules' frame.
5. Enter at least one wildcard pattern in the 'Authorized BIC Rules' frame.

Alternative 3

In case of client collateralisation and you act as a payment bank:

1. Enter a wildcard patterns to capture your clients BICs.
2. Click on the *submit changes* button.

Repetition

To assign more than one wildcard pattern, repeat alternative 3.

You can only add up to 10 wildcard patterns at once.

General Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

7. Click on the *submit* button.

⇒ In case you created a new primary central bank CMB a prompt will ask if you want to continue with the configuration by creating the auto-collateralisation limit.

8. Click on the *no* button.

➡ A new credit memorandum balance has been created.

3.7.5.2 Set up an Auto-Collateralisation Limit

Context of Usage

This business scenario describes how to set up an auto-collateralisation limit in order to cap the intraday credit provided on a specific T2S dedicated cash account either for central bank collateralisation, client collateralisation, set up of an external guarantee or unsecured credit limit. In the first case you cap the credit you provide to one of your payment bank on a specific T2S dedicated cash account (relevant for CB users), whereas in the second case you cap the credit you provide to one of your clients on a specific T2S dedicated cash account (relevant for payment bank users).

Setting up an auto-collateralisation limit is mandatory for the configuration for a central bank and for the configuration for client collateralisation.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- Limit query
- Create limit

Reference

Further information on screens involved can be found in the screen reference part:

- *Limits* - *search/list* screen [Book 1]
- *Limit* - *new/edit* screen [Book 1]

Instructions

1. Go to the *limits – search/list* screen:
Common >> Cash >> Limits >> Search
2. Click on the *new* button.
⇒ The *limit – new* screen is displayed.
3. Enter all mandatory information about the limit you want to create.
4. Select 'T2S Auto-collateralisation Limit' in the 'Limit Type' field.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

5. Click on the *submit* button.
➔ The new auto-collateralisation limit has been created.

3.7.5.3 Create a New Participant

Context of Usage

This business scenario describes how to create a new participant. Each CSD is responsible for the creation of the party reference data for their CSD participants and for other CSDs that are external to T2S, whereas each CB is responsible for the creation of the party reference data for their payment banks.

Creating a new participant is mandatory for the administration of participants. It is optional for the configuration for intra-CSD settlement, for the configuration for a central bank, for the configuration for central bank collateralisation and for the configuration for client collateralisation.

Before you start, check whether the participant has not already been created by someone else. Also, make sure that the party BIC you want to use for the new participant has been created in the BIC directory. Finally you have to check if a mandatory market-specific attribute is required.

Privileges

To carry out this business scenario, you need the following privileges [▶]:

- Party list query
- Create party

Reference

Further information on screens involved can be found in the screen reference part:

- *Parties – search/list* screen [Book 1]
- *Party – new/edit* screen [Book 1]

Instructions

1. Go to the *parties – search/list* screen:
Common >> Parties >> Parties >> Search
2. Click on the *new* button.
⇒ The *party – new* screen is displayed.
3. Enter all mandatory information in the 'Party', 'Address' and 'Auto-Collateralisation Rules' frames.
If the party type is 'CSD participant', the 'Address' frame is not available.
The 'Auto-Collateralisation Rule' frame is only available for the 'Payment Bank' party type.
4. To add a technical address, market-specific attribute or restriction, enter all mandatory information in the 'Technical Addresses', 'Market-Specific Attributes' and 'Restrictions' frames.
The 'Market-Specific Attributes' frame is only mandatory, if the market-specific attribute is defined as mandatory.
At least one technical address has to be defined.
5. Click on the *add row* button.
⇒ A new technical address, market-specific attribute or restriction has been added to the list.

Repetition

To add more technical addresses, market-specific attributes or restrictions, repeat steps 4 and 5.

You can add up to 10 technical addresses, market-specific attributes or restrictions.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

6. Click on the *submit* button
➔ The new participant has been created.

3.7.5.4 Create a New Securities Account

Context of Usage	<p>This business scenario describes how to create a new securities account. Each CSD is responsible for opening securities accounts in its books for itself and all its participants. T2S envisages the following types of securities accounts:</p> <ul style="list-style-type: none"> ■ CSD participant account, i.e. the ordinary securities account used for the settlement of instructions ■ CSD mirror account, CSD omnibus account and inter-CSD account, all used for cross-CSD settlement ■ Issuance account, i.e. the securities account reflecting the holdings of the participants of the issuer CSD for a given financial instrument. The issuer CSD can specify the issuance account for any given security when setting up its securities CSD links configuration for the same security ■ T2S technical offset account, i.e. a specific technical account foreseen for settlement in the direct holding markets only <p>T2S provides the possibility to define a time-dependent relationship between CSD participants and securities accounts. This means that the CSD can change the relationship between the CSD participant and the securities accounts. Only one CSD must be linked to the securities account at any point in time. There is no limit on the number of securities accounts a single party can own within the same CSD.</p> <p>Before you start, check whether the securities account has not already been created by someone else. Finally you have to check if a mandatory market-specific attribute is mandatory.</p> <p>This business scenario is not relevant for CB and payment bank users.</p>
Privileges	<p>To carry out this business scenario, you need the following privileges [▶]:</p> <ul style="list-style-type: none"> ■ Securities account list query ■ Create securities account ■ Update securities account
Reference	<p>Further information on screens involved can be found in the screen reference part:</p> <ul style="list-style-type: none"> ■ <i>Securities accounts – search/list</i> screen [▶] ■ <i>Securities account – new/edit</i> screen [▶]
Instructions	<ol style="list-style-type: none"> 1. Go to the <i>securities accounts – search/list</i> screen: T2S >> Securities Accounts >> Securities Account >> Search 2. Click on the <i>new</i> button. ⇒ The <i>securities account – new</i> screen is displayed.

3. Enter all mandatory information in the 'Securities Account' frame.
4. To add a market-specific attribute or a restriction, enter all mandatory information in the 'Market-Specific Attributes' and 'Restrictions' frames.
5. Click on the *add row* button.

Repetition

To add more market-specific attributes or restrictions, click on the *submit changes button* and repeat steps 4 and 5.

You can add up to 10 market-specific attributes or restrictions.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

6. Click on the submit button.
- ➔ The new securities account has been created.

3.7.5.5 Link a Securities Account to a T2S Dedicated Cash Account for Cash Settlement Purpose

Context of Usage	<p>This business scenario describes how to link a securities account to a T2S dedicated cash account for cash settlement purpose for the settlement of the cash leg of the settlement instructions related to a given securities account belonging to one of your participants.</p> <p>Before you start, verify that a credit memorandum balance has been previously created.</p> <p>This business scenario is not relevant for CB, payment bank and CSD participant users.</p>
Privileges	<p>To carry out this business scenario, you need the following privileges [▶]:</p> <ul style="list-style-type: none"> ■ Create CMB securities account link ■ CMB securities account link query
Reference	<p>Further information on screens involved can be found in the screen reference part:</p> <ul style="list-style-type: none"> ■ <i>Securities accounts links – search/list</i> screen [▶] ■ <i>Securities accounts link – new/edit</i> screen [▶]

Instructions

1. Go to the *Securities account links – search/list* screen:
T2S >> Securities Account >> Account Links
2. Click on the *new* button.
⇒ The *Securities account links – new* screen is displayed.
3. Enter all mandatory information in the 'Account Link' frame and set the cash settlement link flag to 'Yes'.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

4. Click on the *submit* button.
⇒ A new CMB securities account link has been created.

3.8 Securities

3.8.1 Administration of Securities

Overview

This business package describes the administration of securities.

To administer your securities, carry out the following business scenarios in the predefined order.

Business Scenarios

- Create a new security [▶]
- Configure security CSD links [▶]
- Create a new securities valuation [▶]

3.8.1.1 Create a New Security

Context of Usage

This business scenario describes how to create a new security in CRDM.

The set-up of a security in T2S involves the creation of the security itself and of all related links and entities that enable the security to be used for cross-CSD and external-CSD settlement.

CSDs are responsible for the creation of the security and the creator CSD is the party that physically creates the entry in CRDM.

After the creation of a security a CSD wanting to allow settlement on that financial instrument should create a new security CSD link to define its eligibility for settlement.

During the lifecycle of the security, the maintainer CSD is responsible for the maintenance and update of the given financial instrument.

Before you start, check whether a mandatory market-specific attribute is required.

This business scenario is not relevant for CB, payment bank and directly connected participant users.

Privileges To carry out this business scenario, you need the following privileges [►]:

- Create security
- Securities reference data query

Reference Further information on screens involved can be found in the screen reference part:

- *Securities – search/list* screen [►]
- *Security – new/edit* screen [►]

Instructions

1. Go to the *securities – search/list* screen:
T2S >> Securities >> Securities >> Search
2. Click on the *new* button.
⇒ The *security – new* screen is displayed.
3. Enter all mandatory information in the 'Security' frame. The ISIN related to the new security must be unique.
The maturity date must be equal to or later than the current date and later than the issue date.
4. To add a deviating settlement unit, market-specific attribute or a restriction, click on the *add row* button in the 'Deviating Settlement Units', 'Market-Specific Attributes' or 'Restrictions' frames. The 'Market-Specific Attributes' frame is only mandatory, if the market-specific attribute is defined as mandatory.
5. Enter all mandatory information in the available fields of the 'Deviating Settlement Units', 'Market-Specific Attributes' or 'Restrictions' frames.
6. Click on the *submit changes* button.
⇒ A new deviating settlement unit, market-specific attribute or restriction has been added to the list.

Repetition

Repeat steps 4, 5 and 6 to add more deviating settlement units, market-specific attributes or restrictions.

You can add up to 10 deviating settlement units, market-specific attributes or restrictions.

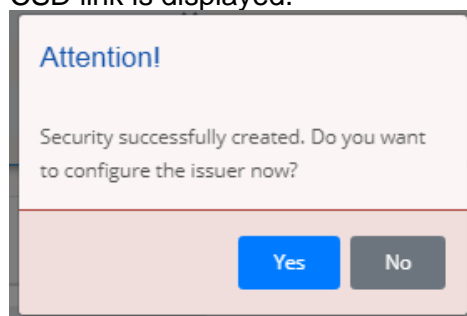

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

7. Click on the *submit* button.

⇒ A confirmation prompt asking whether you want to create a new securities CSD link is displayed.

8. Click on the *yes* button to continue with the next business scenario. Click on the *no* button to finish creating a new security without further actions.

➔ The new security has been created.

3.8.1.2 Configure Security CSD Links

Context of Usage

This business scenario describes how to configure a security CSD link in order to allow the securities' eligibility for cross-CSD settlement, Intra-CSD settlement and external CSD settlement.

All other investor CSDs that want to settle a security issued by another CSD must define their technical issuer CSD for that security. The technical issuer CSD is the CSD where the investor CSD has opened the omnibus account. It is possible to define as technical issuer both the issuer CSD (direct link configuration) or another investor CSD (relayed link configuration). For a complete direct link configuration it is necessary to define only the issuer CSD first and then to create another security CSD link, between the previously defined issuer CSD (referred to as technical issuer) and the investor CSD. If the link is a direct one, the issuer

CSD can decide to specify one or more issuance accounts. If more than one issuance account is specified, the issuer CSD has to indicate the primary account.

Finally, by means of the security maintenance flag it is possible to define a CSD as maintainer for the given financial instrument (security maintaining entity).

Configuring security CSD links is mandatory for the configuration of a cross-CSD settlement, for the configuration of an external-CSD settlement and for the administration of securities.

Before you configure security CSD links, check whether the ISIN and the investor CSD exist. If you are configuring a security CSD link for an ISIN maintained by another CSD, you have to check if you have already added all the mandatory market-specific attributes to the relevant security.

This business scenario is not relevant for CSD participants, CB and payment bank users.

Privileges To carry out this business scenario, you need the following privileges [▶]:

- Securities CSD link query
- Create security CSD link
- Update security CSD link

Reference Further information on screens involved can be found in the screen reference part:

- *Security CSD links – search/list* screen [▶]
- *Security CSD link – new/edit* screen [▶]

Instructions

1. Go to the *security CSD links – search/list* screen:
T2S >> Securities >> Security CSD Link >> Search
2. Click on the *new* button.
⇒ The *security CSD link – new* screen is displayed.
3. Enter all mandatory information.
4. To add an issuance account click on the *add row* button in 'Issuance Accounts' frame.
5. Enter all mandatory information in the available fields of the 'Issuance Accounts' frame.
6. Click on the submit changes button.
⇒ The new issuance account has been added to the list.

Repetition

To add more issuance accounts repeat steps 4 to 6.

You can add up to 10 issuance accounts.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

7. Click on the *submit* button.

➔ The security CSD link has been configured.

3.8.1.3 Create a New Securities Valuation

Context of Usage

This business scenario describes how to create a new securities valuation. Both central banks and payment banks offering auto-collateralisation have to provide prices for securities they have identified as eligible for auto-collateralisation.

Before you start, make sure that the security has already been created.

This business scenario is not relevant for CSD and CSD participant users.

Privileges

To carry out this business scenario, you need the following privileges [►]:

- Securities valuations query
- Create securities valuation

Reference

Further information on screens involved can be found in the screen reference part:

- *Securities valuations – search/list* screen [►]
- *Securities valuation – new/edit* screen [►]

Instructions

1. Go to the *securities valuations – search/list* screen:

T2S >> Securities >> Securities Valuations >> Search

2. Click on the *new* button.

➔ The *securities valuation – new* screen is displayed.

3. Enter all mandatory information in the 'Securities Valuation' frame.

You have to enter an existing ISIN and the parent BIC and BIC of an active party. The combination of security, party and valuation date must be unique. The 'Price' field has to be compliant with the security settlement type defined for that ISIN.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

4. Click on the *submit* button

➔ A new securities valuation has been created.

4 Annex

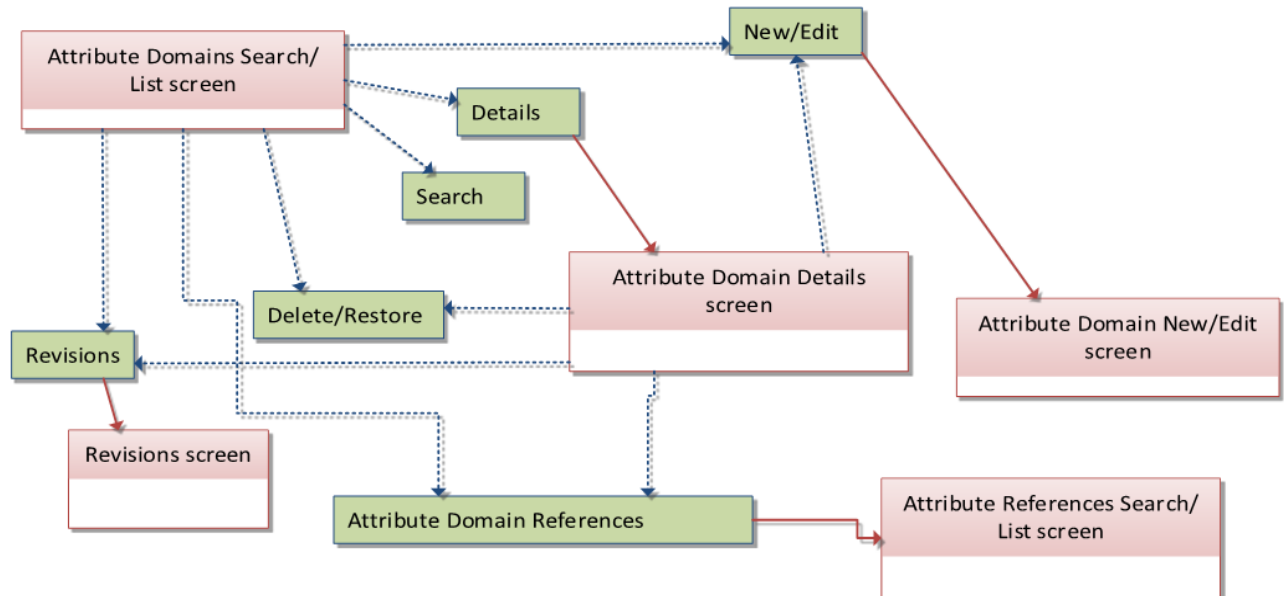

4.1 Sitemap

In the following sub-sections the reader may find the hierarchical, structured illustration of all the CoCo screens and their interrelations.

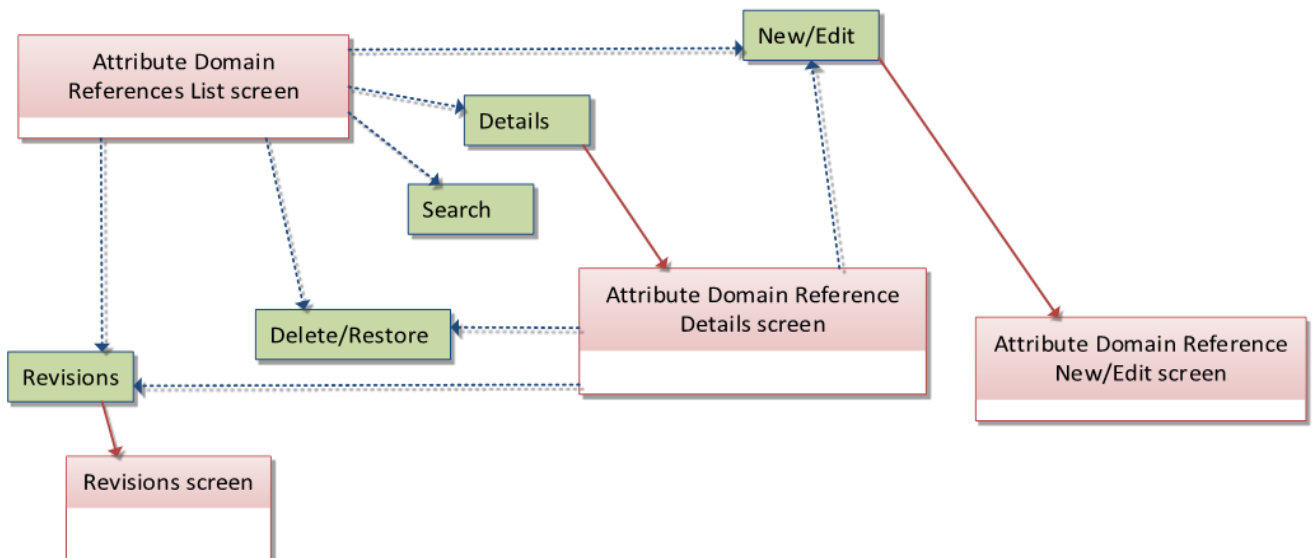

You can find below the legend which explains the meaning of each object, i.e. screen, button, dotted (blue) arrow, solid (red) arrow illustrated in the following diagrams.

Object in the diagram	Description
	The object represents a screen.
	When a button is displayed on the screen, a dotted blue arrow is shown as a link between the screen and the corresponding button.
	The object represents a button which is shown in the relevant screen.
	After a button is pressed, the result can be displayed either on the same screen or in a different screen (e.g. the details screen).

4.3 List of References for Error Messages

4.3.1 Reader's Guide

Reader's Guide This section includes a list of references for error messages for all screens, structured along GUI screens, TMS screens. For GUI screens, the list of references for error messages consists of a general section, which lists overall error codes that apply to all GUI screens, and a section listing all error codes relevant for using the 4-eyes mode in GUI screens. For all sections, these are followed by specific sections for individual screens, which are organised in alphabetical screen order and specify the respective error codes applicable for each screen. Each error code table entry includes the error text and the description.

4.3.2 References for Error Messages

4.3.2.1 Attribute Domain - Details Screen

Reference for error message	Field or Button	Error Text	Description
DRDB001	<ul style="list-style-type: none"> Restore button Delete button 	Requestor not allowed	An Attribute Domain can be deleted/restored only by T2S Operator, CSD or NCB. A User is authorised to delete/restore only data belonging to its own System Entity.
DRDB002	<ul style="list-style-type: none"> Name field Restore button 	Domain Attribute Name already assigned	When performing an Attribute Domain restore request, the Attribute Domain Name to be restored must not be already assigned to an active instance.
DRDB003	<ul style="list-style-type: none"> Status field Delete button 	Data to be updated not found	When performing an Attribute Domain delete request, it must refer to an existing and active instance.
DRDB004	<ul style="list-style-type: none"> Status field Restore button 	Data to be updated not found	When performing an Attribute Domain restore request, it must refer to an existing and deleted instance.
DRDB040	<ul style="list-style-type: none"> Delete button 	The deletion/close is not allowed due to a deletion priority constraint	An Attribute Domain cannot be deleted if there still are valid instances of Attribute Reference or Market-Specific Attribute linked to it.

4.3.2.2 Attribute Domain - New/Edit Screen
